Subject Index

A

ABA (*see* Abscisic acid)
Abscisic acid
  communication between mesophyll and stomata, cotton, 1058
  determination of, ion monitoring, akamatsu, 525
  early phases of seed germination, calmodulin levels, radish, 910
  -induced gene expression, tomato leaf, 1210
  regulation of α-amylase expression, barley aleurone layers, 588
  regulation of 23- to 25-kDa protein group, gene expression, developing maize embryos, 564
  stomatal inhibitor, transpiration stream, wheat plants, 703
  water deficit-induced changes, translatable RNA, soybean hypocotyls, 289
  xanthoxin metabolism, cell-free preparations, tomato, 178
Abscission, cellulase, cloning and regulation, bean, 1257
Acer pseudoplatanus (*see* Sycamore)
Acer saccharum
  catastrophic xylem dysfunction, water stress, 574
  water stress-induced xylem embolism, mechanism of, 581
Acid phosphatase, cell wall-associated, multivalent cations, corn and potato, 61
Acyl coenzyme A, preference of glycerol phosphate pathway, maturing seeds, palm/maize/rapeseed, 56
Adenine nucleotides
  phosphoenolpyruvate carboxylase effect, *Crassula argentea*, 153
  temperature pretreatment in dark, photosynthesis, spinach chloroplasts, 207
Adenosine triphosphatase
  characterization, amyloplast inner envelope, sycamore, 119
  inhibition by *Cercospora beticola*, corn root membrane vesicles, 429
  plasma membrane
    phosphoenzyme reaction states, beet, 77
    transient kinetics, beet, 84
Adenosine triphosphate
  -dependent calcium uptake, senescence-related changes, carnation petals, 295
  effects of irradiance and methyl viologen treatment, ribulose bisphosphate carboxylase, spinach leaves, 850
  proton pumping, microsomal membranes, *Phycomyces blakesleeanus*, 1163
  regulation of pyruvate dehydrogenase complex, plant mitochondria, 1026
  subcellular ATP/ADP ratios, barley protoplasts, 69
S-Adenosylmethionine, -dependent inactivation and radiolabeling, 1-aminocyclopropane-1-carboxylate synthase, tomato, 109
Adenylate, NADP(H) levels and, maize mesophyll chloroplasts, 1461
ADPglucose pyrophosphorylase, starch deficient mutant, *Arabidopsis thaliana*, 1175
Aging (*see also* Senescence)
  deteriorated wheat embryos, root formation, 983
  Flaveria trinervia leaf, C_4 photosynthesis, 125
Agrobacterium tumefaciens, mixed strains, phenolic compounds, soybean cell transformation, 570
Air pollution
  acidic fog and ambient ozone, photosynthesis depression, green pepper, 477
  composition of stable carbon isotopes, conifer trees, 218
  low levels of ozone and sulfur dioxide, translocation of assimilates, Douglas fir, 559
Akamatsu, determination of abscisic acid, ion monitoring, 525
Alcohol dehydrogenase, promoter strength comparisons, mono- and dicotyledonous species, 1063
Aleurone
  barley
    α-amylase expression, hormonal regulation, 588
    α-amylase precursor forms, 1168
Alfalfa
  developmentally arrested nodules, gene expression, 321
  effect of light on sterol changes, 1403
  root, inducers and inhibitors, *Rhizobium meliloti* nodulation genes, 396
Algae
  Chlamydomonas reinhardtii, accumulation, inorganic carbon, 491
  Dunaliella salina, structural aspects, photosystem I, 1201
  energy conversion in photosystem II, 923
  euryhaline microalgae, nitrogen metabolism, osmoregulation, 348
  Gelidium coulteri, salinity effects, carbon allocation, 690
  interaction between chloroplasts, mitochondria and, 973
Alkalinization, medium, L-glutamate, asparagus mesophyll cells, 1042
Allomyces macrogynus, pheromone analog effects, chemotaxis, 139
Allopurinol, inhibition of nodule functioning, cowpea, 1229
Alocasia macrorrhiza, regulation of ribulose-1,5-bisphosphate carboxylase, irradiance changes, 148
Aluminum, toxicity symptoms, proton extrusion, wheat roots, 418
Amaranthus, characterization, photoautotrophic suspension cultures, 1297
Amino acids, transport, membrane vesicles, zucchini, 487
γ-Aminobutyric acid, L-glutamate-dependent medium alkalinization, asparagus mesophyll cells, 1042
1-Aminocyclopropane-1-carboxylic acid, kinetic parameters, ethylene production rate, apple, 553
4-Amino-5-hexynoic acid, inhibitor of tetrapyrrole biosynthesis, various plants, 747
δ-Aminolevulinic acid
  biosynthesis of tetrapyrrole pigment precursors, *Chlorella vulgaris*, 879
  tRNA requirement, formation from glutamate, *Synechocystis* extracts, 1358
1-Aminopropane-1-carboxylate synthase, inactivation and radiolabeling, tomato fruits, 109
Ammonium
  assimilation by green alga, steady-state fluorescence, 97
  induction of nitrate reductase, maize leaves, 1067
  nitrogen assimilation, ryegrass turf, 1303
α-Amylase
  barley aleurone
    hormonal regulation of expression, 588
    precursor forms, 1168
  glucoamylase purification and properties, suspension cultures, beet, 172
β-Amylase, starch phosphorylase inhibitor, sweet potato, 1154
Amyloplasts
  potato, temperature effects, starch synthesis, 1222
  sycamore, ATPase characterization, 119
Anacystis nidulans, immunological characterization, iron-regulated membrane proteins, 497
Anions, chloride, water oxidation, pokeweed, 194
Aphanothece halophytica, carbon dioxide fixation rate, rubisco content, 1120
Apple
  cyanide metabolism, relation, ethylene production, 473
  ethylene-forming enzyme, kinetic parameters, 553
Arabidopsis thaliana
  fusicoccin activity and binding, 999
  HSP70 cognate gene family, characterization, 731
  phytochrome-regulated seedlings, light-harvesting chlorophyll *a/b* protein, 1323
  starch deficient mutant, low ADPglucose pyrophosphorylase, 1175
  thiamin-requiring mutant, 248
Arachis hypogaea (*see* Peanut)
Artichokes, Jerusalem, sucrose synthase, 239
Arum maculatum, mitochondria, measurements of proton pumping, 987
Ascorbate oxidase protein, marked increase by adding copper, pumpkin callus, 656
Asparagus, L-glutamate-dependent medium alkalinization, mesophyll cells, 1042
Atrazine, resistance in isonuclear rapeseed, photosynthesis, 1195
Atriplex spongiosa, metabolite diffusion into bundle sheath cells, 815
Auxin
  bean abscission cellulase, 1257
  -binding protein, solubilization, tobacco,

685
gravitropism in higher plant shoots, 1186
hormone interaction, phenolic metabolism, lettuce, 1136
-induced electrogenic proton pumping, growth, oat coleoptile, 131
kinetics of determination in differentiation, zinnia mesophyll cells, tracheary elements, 92
resistance, membrane-bound auxin binding protein, tobacco, 845
Avena sativa (*see* Oat)
Avocado, cyanide metabolism, relation, ethylene production, 473
Azolla filiculoides, localization and toxic effects, cadmium, copper and uranium, 30

B

Barley
aleurone
α-amylase expression, hormonal regulation, 588
α-amylase precursor forms, 1168
calcium transport in protoplasts, *ml-o* mutants, powdery mildew, 1157
germinating, proteinase from, 1454
leaf, nitrate reduction, glycine support, 1486
low protein cultivar, hordein gene expression, 450
protoplasts, photorespiration, subcellular ATP/ADP ratios, 69
regulation, chlorophyll *a*-apoprotein accumulation, 1246
response to gravistimulation and hormones, dark pretreatment, kinetics, 10
root, salt stress, membrane polypeptide changes, 1263
roots of seedlings, nitrate transport, plasma membrane nitrate reductase, 1141
tonoplast stability and survival, isolated vacuoles, different buffers, 251
Bean
abscission cellulase, 1257
callus cultures, cytokinin oxidase, 245
ethylene-induced abscission, changes, membrane-associated cellulase, 904
inhibited leaf expansion, salinity stress, turgor reduction, 233
root nodules, NADH-dependent glutamate synthase, 1411
Beet
effects of inorganic phosphate, H^+-ATPase, 1073
glucoamylase purification and properties, suspension culture, 172
membrane-bound calcium-dependent protein kinase, localization, characterization, 164
oxygen-18 and deuterium labeling studies, choline oxidation, 695
plasma membrane ATPase
phosphoenzyme reaction states, 77
transient kinetics, 84
sucrose phosphate synthase activity, phytochrome-mediated regulation, maize, 540
Betaine
carbon dioxide fixation rate, rubisco content, *Aphanothece halophytica*, 1120
deficiency, genetic studies, corn, 102
Beta vulgaris (*see* Beet)
Bicarbonate, inhibition of ribulose-1,5-bisphosphate carboxylase, wheat, 462
Biotinylating agents, plasma membrane proteins, 444
Bradyrhizobium japonicum, occurence of self-regulatory response, soybean root, 537
Brassica napus (*see* Rapeseed)
Brassica oleracea (*see* Cauliflower)
Broad bean
guard cells
light quality, osmoregulation, 887
photosystem II, immunological detection, 518
regulation of apoplastic pH, gibberellic acid, 367
Buffers, tonoplast stability and survival, barley, 251
Bundle sheath cells, metabolite diffusion, C_4 plants, 815
Butia capitata (*see* Palm)

C

Cadmium
localization and toxic effects, *Azolla filiculoides*, 30
regulation of sulfate assimilation, corn, 1407
Calcium
ATP-dependent uptake, senescence-related changes, carnation petals, 295
-dependent protein kinase, membrane-bound, characterization in beet, 164
explorations of water oxidizing system, 1
light-affected fluxes, protoplasts, *Vallisneria gigantea*, 228
pyruvate dehydrogenase complex regulation, pea and potato, 1031
transport in barley protoplasts, *ml-o* mutants, powdery mildew, 1157
transport properties, tomato fruit tonoplast, 1097
water stress-induced xylem embolism, mechanism of, 574
Calcium chloride, glucose incorporation, cell wall polysaccharides, cotton roots, 511
Callus, tobacco, refined technique, electrical current application, 515
Calmodulin, changes in levels, seed germination, radish, 910
Cambial zone, determination of abscisic acid, ion monitoring, akamatsu, 525
CAM plants, effect of adenine nucleotides, phosphoenolpyruvate carboxylase, 153
Capsicum annuum (*see* Pepper)
Carbohydrate
metabolism
nitrogen stress response, soybean, 725
pyrophosphate activity, soybean, 862
Carbon
allocation, salinity effects, red alga, 690
fixation, inheritance of C_4 enzymes, *Flaveria*, 532
inorganic
accumulation, *Chlamydomonas reinhardtii*, 491
carbonyl sulfide, cyanobacteria, 800
O_2 photoreduction, cyanobacterium, 6
uptake, *Synechococcus* mutant, 284
isotope discrimination, starch and sugars, C_3 plants, 1418
stable isotope composition
air pollutants, conifer trees, 218
water use efficiency, tomato, 213
translocation of assimilates, ozone and sulfur dioxide, Douglas fir, 559
Carbon dioxide
carbon isotope discrimination, starch and sugars, C_3 plants, 1418
characterization, new photoautotrophic suspension cultures, 1297
communication between mesophyll and stomata, cotton, 1058
concentration and rubisco activity, photosynthesis, soybean leaves, 1310
C_4 photosynthesis, leaf age, *Flaveria trinervia*, 125
effects of various levels, crassulacean acid metabolism, *Portulacaria afra*, 183
fixation rate, rubisco content, *Aphanothece halophytica*, 1120
-induced oscillations in fluorescence, photosynthesis, spinach, 1125
inorganic carbon accumulation, *Chlamydomonas reinhardtii*, 491
Carbonyl sulfide, inhibitor of inorganic carbon transport, cyanobacteria, 800
Carnation, microsomal vesicles, calcium uptake in petals, senescence, 295
Carrot
phosphatidylcholine synthesis, 854
enzymes of, 1338
plasma membrane proteins, 444
polyamines in relation to growth, 224
substrate utilization, 1332
Cassipourea elliptica, catastrophic xylem dysfunction, water stress, 574
Cations, multivalent, acid phosphatase, corn and potato cell walls, 61
Cauliflower, preparation of envelope membranes, nongreen plastids, 709
Cell culture
photoautotrophic, characterization, *Amaranthus* and cotton, 1297
substrate utilization, *in vitro* grown carrot cells, 1332
Cellulase
bean abscission, 1257
membrane-associated, ethylene-induced abscission, bean, 904
Cell wall
-associated acid phosphatase activity, multivalent cations, corn and potato, 61
autolysis, stimulation of ripening, tomato, 1031
dwarf maize, chemical structure, gibberellin, 671
elongation growth in internodes, deepwater rice, 361
inhibited leaf expansion, salinity stress, bean, 233
localization of wheat germ lysozyme, interaction *in situ*, 1317
pectic content, graminaceous monocots, 309
peroxidases, monoclonal antibody production, corn seedlings, 1446
Cercospora beticola, inhibition of ATPase, corn root membrane vesicles, 429
Chara australis, protein loading into vacuole, 1092
Chemotaxis, effects of pheromone analogs, *Allomyces macrogynus*, 139
Chilling, changes in protein synthesis, tomato, 454
Chitinase
antifungal hydrolases in pea tissue, 936
glucanases and, apoplastic compartment, oat leaves, 270

Chlamydomonas reinhardtii
chloroplasts, localization, nitrogen-assimilating enzymes, 947
inorganic carbon accumulation, 491
Chlorella vulgaris, biosynthesis of tetrapyrrole pigment precursors, 879
Chloride, water oxidizing system, 1
chloroplast photosystem II, pokeweed, 194
Chlorophyll *a*
active transport of inorganic carbon, O_2 photoreduction, cyanobacterium, 6
-peridinin-protein complexes, light regulation, *Glenodinium*, 594
regulation of apoprotein, barley, 1246
steady-state fluorescence, ammonium assimilation, green alga, 97
Chloroplasts
barley, subcellular ATP/ADP ratios, 69
Chlamydomonas reinhardtii, localization, nitrogen-assimilating enzymes, 947
corn, adenylate nucleotide levels, 1461
Dunaliella, dihydroxyacetone phosphate reductase, spinach leaf isozymes, 896
Euglena, nuclear localization, IF-2 and IF-3, 993
green leaves and cotyledons of tomato, immunocytolocalization, tomato, 943
guard cells of broad bean, photosystem II, immunological detection, 518
intact, isolation of, *Dunaliella tertiolecta*, 543
mitochondria and, interaction, microalgae, 973
Mougeotia, face orientation, visible and far-red light, 189
oat, glutamine transport, translocator, 1048
pea
circadian control, mRNA levels, 21
norflurazon-treated seedlings, light effects, 340
pokeweed, anion action, water oxidation, 194
spinach
characterization, elemental sulfur, 961
glutamine transport, translocator, 1048
light energy, nitrite photoassimilation, 1373
osmotic adjustment, water stress and photosynthesis, 200
temperature pretreatment in dark, photosynthesis, 207
tobacco, pigments, thiamine-reversible defect in synthesis, 930
Choline, oxidation, deuterium labeling studies, spinach and sugar beet, 695
Chromatography, high performance liquid, disaccharide evaluation, sugarcane vacuoles with UDP-glucose, 266
Chromoplasts
pepper, protein specificity, 42
tomato, DNA methylation, 16
Circadian rhythm
control of mRNA levels, chloroplast proteins, pea, 21
light-harvesting chlorophyll *a/b*-binding protein, tobacco, 1104
phase shift caused by trifluoroleucine, *Lemna gibba*, 953
Citrullis vulgaris (*see* Watermelon)
Citrus sinensis (*see* Orange)
Cochliobolus victoriae, biological activity of host-selective toxins, molecular features, 37
Coenzyme A ligase, 4-coumarate and isoperoxidase expression, zinnia mesophyll cells, 679
Coleoptiles
oat, electrogenic proton pumping, auxin-induced, 131
oat and maize, pulse-induced phototropisms, 823
wheat germ lysozyme, localization, cell wall interaction, 1317
Commelina benghalensis, symplastic mesophyll-sieve tube transfer, fluorescent dyes, 667
Concanavalin A, cytokinin oxidase, bean callus cultures, 245
Conifer trees, composition of stable carbon isotopes, air pollutants, 218
Copper
localization and toxic effects, *Azolla filiculoides*, 30
marked increase in ascorbate oxidase protein, pumpkin callus, 656
Corn
acyl coenzyme A preference, glycerol phosphate pathway, microsomes, 56
betaine deficiency, preliminary genetic studies, 102
cell wall-associated acid phosphatase activity, effects, multivalent cations, 61
chemical structure of cell walls, gibberellin, 671
coleoptiles, pulse-induced phototropisms, 823
endogenous gibberellins, normal and *dwarf* seedlings, 1367
endosperm, *shrunken-1* kernels, sucrose synthesis, 1219
endosperm suspension cultures, sugar uptake, 1235
enzymic synthesis, indole-3-acetyl-1-*O*-β-D-glucose, 1474, 1481
excised roots, ethylene production, nitrogenase activity, 115
gene expression in developing embryos, abscisic acid regulation, 23- to 25-kDa proteins, 564
inhibitor of tetrapyrrole synthesis, 4-amino-5-hexynoic acid, 747
leaf
immunogold localization, nitrate reductase, 1354
nitrate reductase, 1067
membrane-bound auxin-binding protein, solubilization, tobacco, 685
mesophyll chloroplasts, adenylate nucleotide levels, 1461
metabolite diffusion into bundle sheath cells, 815
mono- and dicotyledonous species, promoter strength comparisons, alcohol dehydrogenase, 1063
nitrite reductase, molecular cloning, cDNA, 741
phosphoenolpyruvate carboxylase substrate, 976
protoplasts, heat shock response, 965
regulation of sulfate assimilation, cadmium, 1407
root
ATPase inhibition, *Cercospora beticola*, 429
H^+ cotransports, surface pH, 1469
hexose transport system, 1015
seed, sugars, dessication tolerance, 829
seedling, wall-localized peroxidases, monoclonal antibody production, 1446
sucrose phosphate synthase activity, phytochrome mediation, 540
Cotton
characterization, photoautotrophic suspension cultures, 1297
communication between mesophyll and stomata, 1058
root, glucose incorporation, cell wall polysaccharides, 511
Cotyledons
pea, diamine oxidase development, 441
radish, cytosolic glutamine synthetase, senescing leaves, 1430
soybean, membrane protein, sucrose transport, 1435
4-Coumarate, coenzyme A ligase and isoperoxidase expression, zinnia mesophyll cells, tracheary elements, 679
Cowpea, inhibition of nodule functioning, allopurinol, 1229
C_3 plants, carbon isotope discrimination, starch and sugars, 1418
C_4 plants
inheritance of enzymes, carbon fixation, *Flaveria*, 532
metabolite diffusion, bundle sheath cells, 815
Crassula argentea, effect of adenine nucleotides, phosphoenolpyruvate carboxylase, 153
Crassula falcata, histochemical compartmentation, photosynthesis, 633
Crassulacean acid, induction of metabolism, carbon dioxide levels, *Portulacaria afra*, 183
Cucumber
azido derivative of paclobutrazol, synthesis, biological activity, 1425
inhibitor of tetrapyrrole synthesis, 4-amino-5-hexynoic acid, 747
Cucumis melo (*see* Muskmelon)
Cucurbita maxima (*see* Squash)
Cucurbita pepo (*see* Zucchini)
Cucurbita (*see* Pumpkin)
Curing, speed of yellowing, ethylene production, tobacco, 329
Cyanide, metabolism in relation to ethylene production, plant tissues, 473
Cyanobacteria
Fremyella diplosiphon, phycobiliprotein transcript accumulation, light acclimation, 1077
inhibitor of inorganic carbon transport, carbonyl sulfide, 800
Nostoc commune, UV-A/B protecting pigment, 1055
rate of O_2 photoreduction, active transport, inorganic carbon, 6
sodium requirement for photosynthesis, 757
Synechococcus mutant, uptake of inorganic carbon, 42-kDa polypeptide, 284
Cymbidium (*see* Orchid)
Cysteine, regulation of sulfate assimilation, cadmium, corn, 1407
Cytochrome P-450, azido derivative of paclobutrazol, synthesis, biological activity, 1425
Cytokinin
biochemistry, leaf senescence, soybean, 788
inhibition of somatic embryogenesis, orchardgrass, 990

kinetics of determination in differentiation, zinnia mesophyll cells, tracheary elements, 92
Cytokinin oxidase, bean callus cultures, concanavalin A affinity, 245
Cytoplasm
pea, light regulation, gene expression, 1397
sycamore, intracellular sites, synthesis and storage, 613
Cytosol
barley, subcellular ATP/ADP ratios, 69
glutamine synthetase, senescing leaves, radish cotyledons, 1430

D

Dactylis glomerata (*see* Orchardgrass)
Daucus carota (*see* Carrot)
13-Deoxy-gibberellins, monoclonal antibodies, 959
Deoxyribonucleic acid
complementary, molecular cloning, maize nitrite reductase, 741
methylation, tomato chromoplasts, 16
Dessication
tolerance
development in anther, *Papaver dubium* pollen, 626
sugars and, seeds of pea/corn/soybean, 829
Deuterium, labeling studies and oxygen-18, choline oxidation, spinach and sugar beet, 695
Diamine oxidase
development through embryonic axis, germination, pea cotyledons, 441
phytochrome control, lentil, 1207
Dianthus caryphyllus (*see* Carnation)
Dihydroxyacetone phosphate reductase, isolation from *Dunaliella* chloroplasts, comparison, spinach leaf isozymes, 896
Dikinase, inheritance of C_4 enzymes, carbon fixation, *Flaveria*, 532
N,N-Dimethyltryptamine, production in *Phalaris aquatica* seedlings, 315
Dinoflagellates, *Glenodinium*, light regulation, peridinin-chlorophyll *a*-protein complexes, 594
Disulfiram, inhibition in thylakoid membranes, spinach, 1021
Dolichos biflorus, heat shock enhancement, synthesis, lectin-related protein, 1131
Douglas fir, translocation of carbon, ozone and sulfur dioxide, 559
Dunaliella, isolation of dihydroxyacetone phosphate reductase, chloroplasts, spinach leaf isozymes, 896
Dunaliella salina, structural aspects, photosystem I, 1201
Dunaliella tertiolecta
energy conversion, photosystem II, 923
isolation of intact chloroplasts, 543
Dyes, fluorescent, symplastic mesophyll-sieve tube transfer, *Commelina benghalensis*, 667

E

Electrical current, refined technique for application, tobacco callus cultures, 515
Embryogenesis, somatic, inhibition of, orchardgrass, 990
Endoproteinase, germinating barley, 1454
Endosperm
corn, sugar uptake, suspension cultures, 1235
shrunken-1 kernels of maize, sucrose synthase, 1219
Envelope membranes, preparation of, nongreen plastids, 709
Epicotyls
pea
ethylene effect, extensin and peroxidase distribution, 522
ethylene treatment, *N*-1-naphthylphthalamic acid, 795
growth and solute import, 1240
Eschscholtzia californica, L-tyrosine decarboxylase, elicitor-induced, suspension cultures, 46, 52
Ethanol, inhibition of tomato fruit ripening, 143
Ethylene
bean abscission cellulase, 904, 1257
biosynthesis, inhibition by salicylic acid, pear, 833
cell wall autolysis, stimulation of ripening, tomato, 1031
effect on extensin and peroxidase distribution, subapical region, pea epicotyls, 522
-forming enzyme, kinetic parameters, apple, 553
hormone interaction, phenolic metabolism, lettuce, 1136
-inducible gene expression, tomato fruit, 370
nitrogenase activity, excised corn and sorghum roots, 115
overproducing tomato mutant, characterization, 774
polar IAA transport, *N*-1-naphthylphthalamic acid, pea epicotyls, 795
production, cyanide metabolism, plant tissues, 473
production in orchid flowers, photoacoustic detection, 506
production in tobacco, speed of yellowing, curing, 329
Euglena, gene location, chloroplast IF-2 and IF-3, 993
Extensin, ethylene effect on distribution, subapical region, pea epicotyls, 522

F

Fatty acids, branched chain, peroxisomal oxidative decarboxylation, mung bean, 13
Ferredoxin, cross-linking to 22-kDa subunit, photosystem I, spinach, 810
Fescue, fructan in grass leaf blades, 1349
Festuca arundinacea (*see* Fescue)
Flaveria trinervia
carbon fixation, inheritance, C_4 enzymes, 532
influence of leaf age, C_4 photosynthesis, inorganic carbon accumulation, 125
Flower
bud distribution, 1-naphthaleneacetic acid, tobacco explants, 752
carnation petals, calcium transport, senescence, 295
orchid, ethylene production, photoacoustic detection, 506
spermidine binding protein, thin-layer tobacco tissue culture, 996
Fluorescence
carbon dioxide-induced oscillations, photosynthesis, spinach, 1125
chlorophyll *a*, ammonium assimilation, green alga, 97
steady-state yield, photosynthetic efficiency, spinach, 158
Fluorescent dyes, symplastic mesophyll-sieve tube transfer, *Commelina benghalensis*, 667
Fremyella diplosiphon
phycobiliprotein mRNA synthesis, photoreversible light effects, 1084
phycobiliprotein transcript accumulation, light acclimation, 1077
Fructan, grass leaf blades, 1349
Fructose, sugar uptake, maize endosperm suspension cultures, 1235
Fructose 2,6-bisphosphate, inhibition of phosphoglucomutase, pea, 980
Fructose-6-phosphate, carbohydrate metabolism in soybean, 862
Fruit, pea, sucrose and malate exportation, 466
Fungal elicitor, regulation of isoprenoid metabolism, tobacco, 1291
Fusicoccin
activity and binding, *Arabidopsis thaliana*, 999
early phases of seed germination, calmodulin levels, radish, 910
electrogenic proton pumping, growth, oat coleoptile, 131

G

Galactolipid, asymmetry, oat thylakoid development, 412
Gametes, sirenin effect on motility, *Allomyces macrogynus*, 139
Gametophytes, male, protein patterns, wheat, 969
Gelidium coulteri, salinity effects on photosynthesis, carbon allocation, nitrogen assimilation, 690
Genes
expression, light regulation, pea, 1397
HSP70 cognate gene family, characterization, *Arabidopsis thaliana*, 731
nopaline synthase promoter, developmental regulation, tobacco, 547
normal and *dwarf*, endogenous gibberellins, corn seedlings, 1367
nuclear location of IF-2 and IF-3, *Euglena* chloroplasts, 993
shrunken-1 and *Adh*, promoter strength comparisons, mono- and dicotyledonous species, 1063
shrunken-1 kernels of maize, sucrose synthesis, 1219
Germination
early phases in radish seed, changes, calmodulin and inhibitor, 910
Kalanchoë blossfeldiana, action spectra, low fluence, 276
oxygen supply through embryonic axis, diamine oxidase, pea cotyledons, 441
white wheat embryo, endogenous inhibitor, L-trytophan, 435
Gibberellic acid
regulation of α-amylase expression, barley aleurone layers, 588
regulation of apoplastic pH, source leaves, broad bean, 367
Gibberellin
chemical structure of cell walls, dwarf maize, 671
elongation growth in internodes, deepwater rice, 361
endogenous

navel orange shoots, 639
normal and *dwarf* corn seedlings, 1367
inhibitor of biosynthesis, azido derivative, paclobutrazol, 1425
Glenodinium, light regulation, peridinin-chlorophyll *a*-protein, 594
β-D-Glucan, chemical structure of cell walls, gibberellin, dwarf maize, 671
Glucanase, chitinases and, apoplastic compartment, oat leaves, 270
β-1,3-Glucanase, antifungal hydrolases in pea tissue, 936
Glucoamylase, purification and properties, suspension cultures, beet, 172
Glucose
incorporation into cell wall polysaccharides, cotton roots, 511
substrate utilization, *in vitro* grown carrot cells, 1332
sugar uptake, maize endosperm suspension cultures, 1235
Glutamate
-dependent medium alkalinization, asparagus mesophyll cells, 1042
formation of δ-aminolevulinic acid, tRNA requirement, *Synechocystis* extracts, 1358
Glutamate synthase, NADH-dependent, bean root nodules, 1411
Glutamine, transport and role of translocator, chloroplasts, oat and spinach, 1048
Glutamine synthetase
cytosolic, senescing leaves, radish cotyledons, 1430
immunocytolocalization of, green leaves and cotyledons, tomato, 943
tabtoxinine-β-lactam-insensitive leaf, pathogen tolerance, oat, 333
Glutamyl-tRNA, biosynthesis of tetrapyrrole pigment precursors, *Chlorella vulgaris*, 879
Glycerol phosphate, acyl coenzyme A preference, maturing seeds, palm/maize/rapeseed, 56
Glycine
reduction of nitrate, barley leaves, 1486
subcellular ATP/ADP ratios, barley protoplasts, 69
Glycine max (*see* Soybean)
Glycinin, survey of proteolytic activities, Kunitz trypsin inhibitor, soybean, 355
Glycolysis, interaction between chloroplasts, mitochondria and, microalgae, 973
Glyoxysomes, superoxide dismutase distribution, watermelon and pea, 1215
Glyphosate, tolerance in tobacco, 661
Gonyautoxins, paralytic shellfish toxins, *Protogonyaulax tamarensis*, axenic culture, 1285
Grass, leaf blades, fructan, 1349
Gravitropism
higher plant shoots, 1186
hormones and, dark pretreatment, barley pulvini, 10
Guard cells
broad bean
light quality, osmoregulation, 887
photosystem II, immunological detection, 518

H

H^+-ATPase
effects of inorganic phosphate, red beet, 1073
Phycomyces blakesleeanus, microsomal membranes, 1163
Heat, salt shock and, tobacco, 618
Heat shock
HSP70 cognate gene family, characterization, *Arabidopsis thaliana*, 731
response, maize protoplasts, 965
synthesis of lectin-related protein, *Dolichos biflorus*, 1131
Helianthus tuberosus (*see* Artichokes, Jerusalem)
Hexose
sugar uptake, maize endosperm suspension cultures, 1235
transport system, maize root tips, 1015
Hordein, gene expression, low protein barley cultivar, 450
Hordeum vulgare (*see* Barley)
Hormones, gravistimulation and, dark pretreatment, barley pulvini, 10
Hydrolases, antifungal, pea tissue, 936
Hydroxycinnamoyl putrescine, effect of hormone treatment, growth bud formation, tobacco leaf explant, 600
Hydroxypyruvate reductase, NADPH-dependent, photorespiratory metabolism, pea leaf, 1182
Hypocotyls, soybean, water deficit, abscisic acid, 289
Hypoxia, appearance of wound-response proteins, potato, 805

I

Ice nuclei, nonbacterial, *Prunus* wood, 915
Indole-3-acetic acid
dark-grown tomato seedlings, 780
hormone interaction, phenolic metabolism, lettuce, 1136
inhibition of somatic embryogenesis, endogenous cytokinins, orchardgrass, 990
loss from tissue culture, nutrient salts, muskmelon, 379
polar transport and ethylene effect, *N*-1-naphthylphthalamic acid, pea epicotyls, 795
Indole-3-acetyl-1-*O*-β-D-glucose, enzymic synthesis in corn, 1474, 1481
Initiation factors
IF-2 and IF-3, nuclear gene location, *Euglena* chloroplasts, 993
large subunit of 4F, phosphorylation, wheat germ kinase, 483
Internodes, elongation growth of deepwater rice, 361
Inulin, sucrose synthase, protoplasts, Jerusalem artichoke tubers, 239
Ipomoea batatas (*see* Sweet potato)
Iron
efficiency, gene control, proteins, 785
-regulated membrane proteins, immunological characterization, *Anacystis nidulans*, 497
Irradiance
limits of crop productivity, wheat, 869
methyl viologen treatment and, ribulose bisphosphate carboxylase, spinach leaves, 850
Isoperoxidase, 4-coumarate:coenzyme A ligase, zinnia mesophyll cells, 679
Isoprenoids, sesquiterpene cyclase and squalene synthetase, regulation of metabolism, tobacco, 1291

K

Kalanchoë blossfeldiana, induction of germination, action spectra, low fluence, 276
Kinase, phosphorylation of eIF-4F, wheat germ, 483

L

Laser-driven photoacoustic detection, ethylene production, orchid flowers, 506
Leaf
Arabidopsis thaliana, fusicoccin activity and binding, 999
barley, nitrate reduction, glycine support, 1486
bean, inhibited expansion, salinity stress, 233
broad bean, pH regulation, gibberellic acid, 367
Commelina benghalensis, fluorescent dyes, symplastic mesophyll-sieve tube transfer, 667
conifer tree, composition of stable carbon isotopes, air pollutants, 218
corn
immunogold localization, nitrate reductase, 1354
nitrate reductase, 1067
phosphoenolpyruvate carboxylase substrate, 976
C_3 plants, carbon isotope discrimination, starch and sugars, 1418
Flaveria trinervia, age of, C_4 photosynthesis, 125
grass blades, fructan, 1349
oat
glucanases and chitinases, 270
pathogen tolerance, glutamine synthetases, 333
orchardgrass, somatic embryogenesis, cytokinins, 990
pea
photorespiratory metabolism, NADPH-dependent hydroxypyruvate reductase, 1182
shoot RNA changes, turgor reduction, 401
radish, senescence, cytosolic glutamine synthetase, 1430
soybean
carbohydrate metabolism, nitrogen stress, 725
carbon dioxide concentration, rubisco activity, 1310
senescence, cytokinin biochemistry, 788
spinach
dihydroxyacetone phosphate reductase, *Dunaliella* chloroplasts, 896
light energy, nitrite photoassimilation, 1373
purification and assay, rubisco activase, 1008
tobacco, hormone treatment effect, growth bud formation, 600
tomato
abscisic acid-induced gene expression, 1210
immunocytolocalization, glutamine synthetase, 943
Lectin-related protein, heat shock, *Dolichos biflorus*, 1131
Lemna gibba, phase shift of circadian rhythm, trifluoroleucine, 953
Lemna paucicostata, enzymes of phosphati-

dylcholine synthesis, 1338
Lens culinaris (*see* Lentil)
Lentil, phytochrome control, diamine oxidase, 1207
Lettuce
hormone interaction, phenolic metabolism, russet spotting, 1136
sodium and potassium compartmentation, transport in roots, 1279
Leucine analog, trifluoroleucine, phase shift of circadian rhythm, *Lemna gibba*, 953
Light
acclimation, phycobiliprotein transcript accumulation, *Fremyella diplosiphon*, 1077
adenylate and NADP(H) levels, maize mesophyll chloroplasts, 1461
-affected Ca^{2+} fluxes, protoplasts, *Vallisneria gigantea*, 228
-dark regimes, nitrate reductase gene expression, tomato and tobacco, 383
degradation of indole-3-acetic acid, nutrient salts, muskmelon, 379
energy, nitrite photoassimilation, spinach leaf chloroplast, 1373
induction of nitrate reductase, maize leaves, 1067
photoreversible effects, phycobiliprotein mRNA synthesis, *Fremyella diplosiphon*, 1084
phytochrome control of diamine oxidase, lentil, 1207
phytochrome-mediated regulation, nitrate reductase expression, squash cotyledons, 242
plastid photooxidation, transcription inhibition of encoded genes, rye, 255
quality, osmoregulation, broad bean guard cells, 887
regulation of chlorophyll *a*-apoprotein accumulation, barley, 1246
regulation of gene expression, pea, 1397
regulation of peridinin-chlorophyll *a*-protein, *Glenodinium*, 594
sterol changes in alfalfa, 1403
visible and far-red, chloroplast face orientation, *Mougeotia*, 189
Light-harvesting chlorophyll *a*/*b* protein
gene expression, diurnal and circadian rhythms, tobacco, 1104
membrane insertion, soluble protein factor, pea, 1146
phytochrome regulation, *Arabidopsis thaliana* seedlings, 1323
Lignin, 4-coumarate:coenzyme A ligase and isoperoxidase, expression, zinnia mesophyll cells, 679
Lolium perenne (*see* Ryegrass)
Lycopersicon esculentum (*see* Tomato)
Lysozyme, wheat germ, localization, cell wall interaction, 1317

M

Magnesium
ATPase characterization, amyloplast inner envelope, sycamore, 119
proton pumping, microsomal membranes, *Phycomyces blakesleeanus*, 1163
regulation of pyruvate dehydrogenase complex, plant mitochondria, 1026
Maize (*see* Corn)
Malate, sucrose exportation and, pea fruit, 466
Malate dehydrogenase, adenylate nucleotide levels, maize mesophyll chloroplasts, 1461
1-(Malonylamino)cyclopropane-1-carboxylic acid, intracellular sites of synthesis and storage, sycamore cells, 613
Malus sylvestris (*see* Apple)
Medicago sativa (*see* Alfalfa)
Mesophyll cells
asparagus, L-glutamate-dependent medium alkalinization, 1042
sieve tube transfer, fluorescent dyes, *Commelina benghalensis*, 667
stomata and, communication, cotton, 1058
zinnia, 4-coumarate:coenzyme A ligase, isoperoxidase expression, 679
Methyl viologen, effects of irradiance and, ribulose bisphosphate carboxylase, spinach leaves, 850
Microalgae, interaction between chloroplasts, mitochondria and, 973
Microsome, proton pumping, *Phycomyces blakesleeanus*, 1163
Mildew, powdery, calcium transport, barley mutants, 1157
Millet, mechanisms of starvation tolerance, 1381
Mitochondria
Arum maculatum, measurements, proton pumping, 987
barley, subcellular ATP/ADP ratios, 69
chloroplasts and, interaction, microalgae, 973
pea, regulation, pyruvate dehydrogenase complex, 1026, 1031
pea and soybean, occurrence, alternative respiratory capacity, 528
potato
nicotinamide nucleotide transhydrogenase, 303
regulation, pyruvate dehydrogenase complex, 1031
Monoclonal antibodies
13-deoxy-gibberellins, 959
production and characterization, wall-localized peroxidases, corn seedlings, 1446
Monocots, graminaceous, pectic content, cell walls, 309
Motor cells, potassium channels, *Samanea saman*, 643
Mougeotia, face chloroplast orientation, visible and far-red light, action spectrum, 189
Mung bean
cyanide metabolism, relation, ethylene production, 473
peroxisomal oxidative decarboxylation, branched fatty acids, 13
Muskmelon, loss of indole-3-acetic acid from media, nutrient salts, 379

N

NADH, nitrate reduction, glycine support, barley leaves, 1486
NADPH
adenylate nucleotide levels, maize mesophyll chloroplasts, 1461
-dependent hydroxypyruvate reductase, photorespiratory metabolism, pea leaf, 1182
presence of nicotinamide nucleotide transhydrogenase, potato tuber mitochondria, 303
NADP-malic enzyme, inheritance of C_4 enzymes, carbon fixation, *Flaveria*, 532
1-Naphthaleneacetic acid, polar acid, flower bud distribution, tobacco explants, 752
N-1-Naphthylphthalamic acid, effect of ethylene treatment on polar IAA transport, pea epicotyls, 795
Nicotiana (*see* Tobacco)
Nicotinamide nucleotide transhydrogenase, presence in potato tuber mitochondria, 303
Nitrate
-fed soybean, charge balance, 605
reduction, glycine support, barley leaves, 1486
transport, plasma membrane nitrate reductase, barley seedling roots, 1141
Nitrate reductase
expression in squash cotyledons, phytochrome-mediated light regulation, 242
gene expression, tomato and tobacco, 383
immunogold localization, maize leaves, 1354
role of nitrate and ammonium ions, light and, maize leaves, 1067
Nitrite
conversion to nitrogen oxide, NADPH-nitrate reductase enzyme, soybean, 389
photoassimilation, light energy, spinach leaf chloroplast, 1373
Nitrite reductase, corn, molecular cloning, cDNA, 741
Nitrogen
-assimilating enzymes, localization, *Chlamydomonas reinhardtii*, 947
assimilation
ryegrass turf, 1303
salinity effects, red alga, 690
metabolism and osmoregulation, euryhaline microalgae, 348
properties of small basic peptide, pumpkin seeds, 770
stress, leaf carbohydrate metabolism, soybean, 725
Nitrogenase, enodogenous ethylene production, excised corn and sorghum roots, 115
Nodule, cowpea, inhibition of function, allopurinol, 1229
Nodulin, gene expression, alfalfa nodules, 321
Nopaline synthase promoter, organ-specific and developmental regulation, transgenic tobacco plants, 547
Norflurazon, -treated pea seedlings, light effects, chloroplast components, 340
Nostoc commune, UV-A/B protecting pigment, 1055
Nucleus, light regulation of gene expression, pea, 1397

O

Oat
biological activity of host-selective toxins, *Cochliobolus victoriae*, 37
chloroplasts, glutamine transport, translocator, 1048
coleoptile
growth, electrogenic proton pumping, 131
pulse-induced phototropisms, 823
inhibitor of tetrapyrrole synthesis, 4-amino-5-hexynoic acid, 747
leaf, glucanases and chitinases, 270
pathogen-tolerant, tabtoxinine-β-lactam-

insensitive leaf glutamine synthetases, 333
thylakoid development, galactolipid asymmetry, 412
Oil, acyl coenzyme A preference, glycerol phosphate pathway, palm/maize/rapeseed, 56
Orange
navel, endogenous gibberellins in shoots, 639
water deficit effects, photosynthesis, 375
Orchardgrass, inhibition of somatic embryogenesis, endogenous cytokinins, 990
Orchid, measurement of ethylene production in flowers, photoacoustic detection, 506
Oryza sativa (*see* Rice)
Osmoregulation, light quality and, broad bean guard cells, 887
Osmosis, nitrogen metabolism, euryhaline microalgae, 348
Oxalic acid, water stress-induced xylem embolism, mechanism of, 574
Oxygen
anion action, chloroplast photosystem II, pokeweed, 194
concentration, ethylene-forming enzyme, apple, 553
explorations of water oxidizing system, 1
supply through embryonic axis, diamine oxidase, pea cotyledons, 441
viability of rice protoplasts, isolation process, 26
Oxygen-18, deuterium labeling studies, choline oxidation, spinach and sugar beet, 695
Ozone
effects on photosynthesis, wheat, 1115
low levels, translocation of assimilates, Douglas fir, 559

P

Paclobutrazol, azido derivative of, synthesis, biological activity, 1425
Palm, acyl coenzyme A preference, glycerol phosphate pathway, microsomes, 56
Panicum miliaceum, metabolite diffusion into bundle sheath cells, 815
Papaver dubium, pollen, dessication tolerance, development in anther, 626
Pea
antifungal hydrolases, 936
circadian control of mRNA levels, 21
embryonic axis during germination, diamine oxidase, cotyledons, 441
epicotyls
ethylene effect, extensin and peroxidase distribution, 522
ethylene treatment, *N*-1-naphthylphthalamic acid, 795
growth and solute import, 1240
fruit, sucrose and malate exportation, 466
inhibition of phosphoglucomutase, fructose 2,6-bisphosphate, 980
inhibitor of tetrapyrrole synthesis, 4-amino-5-hexynoic acid, 747
leaf, photorespiratory metabolism, NADPH-dependent hydroxypyruvate reductase, 1182
light regulation of gene expression, 1397
mitochondria, regulation, pyruvate dehydrogenase complex, 1026
occurrence of alternative respiratory capacity, 528
regulation of phosphorylation, mitochondrial pyruvate dehydrogenase complex, 1031
seed, sugars, dessication tolerance, 829
seedling, norflurazon-treated, light effects, 340
soluble protein factor, membrane insertion, thylakoid precursor protein, 1146
superoxide dismutase in peroxisomes, intraorganellar distribution, 1215
turgor reduction, changes in shoot RNA, 401
Pectin, content in cell walls, graminaceous monocots, 309
Pennisetum glaucum (*see* Millet)
Pennycress, thermoinductive temperatures, site of perception, localization, 424
Pepper
chromoplast-specific proteins, 42
depression of photosynthesis, acidic fog, ambient ozone, 477
Pericarp, peeled, long-term *in vitro* culture, wheat grains, 409
Peridinin, -chlorophyll *a*-protein complexes, light regulation, *Glenodinium*, 594
Peroxidase
auxin resistance, membrane-bound auxin binding protein, tobacco, 845
ethylene effect on distribution, subapical region, pea epicotyls, 522
wall-localized, monoclonal antibody production, corn seedlings, 1446
Peroxisomes
mung bean, oxidative decarboxylation, branched fatty acids, 13
NADPH-dependent hydroxypyruvate reductase, photorespiratory metabolism, pea leaf, 1182
watermelon and pea, superoxide dismutase distribution, peroxisomes, 1215
Persea gratissima (*see* Avocado)
Petunia, transgenic plants, synthesis, zein protein, 1002
pH
H^+ cotransports in corn roots, 1469
regulation by gibberellic acid, source leaves, broad bean, 367
Phalaris aquatica, seedlings, *N,N*-dimethyltryptamine production, 315
Phaseic acid, regulation of α-amylase expression, barley aleurone layers, 588
Phaseolus vulgaris (*see* Bean)
Phenolic compounds
hormone interaction and metabolism, russet spotting, lettuce, 1136
mixed *Agrobacterium tumefaciens* strains and, soybean cell transformation, 570
Pheromone analogs, effects on chemotaxis, *Allomyces macrogynus*, 139
Phleum pratense (*see* Timothy)
Phosphate, inorganic, H^+-ATPase, red beet, 1073
Phosphatidylcholine
enzymes of synthesis, *Lemna*, soybean and carrot, 1338
synthesis in soybean and carrot, 854
Phosphoenolpyruvate carboxylase
effect of adenine nucleotides, *Crassula argentea*, 153
inheritance of C_4 enzymes, carbon fixation, *Flaveria*, 532
substrate form, kinetic studies, 976
Phosphoglucomutase
inhibition by fructose 2,6-bisphosphate, pea, 980
starchless mutant of tobacco, 838
Phospholipids, dessication tolerance of *Papaver dubium* pollen, development in anther, 626
Phosphorylation
eIF-4F wheat germ kinase, 483
regulation of pyruvate dehydrogenase complex, pea and potato, 1031
Photoacoustic detection system, laser-driven, ethylene production, orchid flowers, 506
Photoaffinity labeling, azido derivative of paclobutrazol, synthesis, biological activity, 1425
Photoassimilation, nitrite, light energy, spinach leaf chloroplast, 1373
Photon flux density, regulation of ribulose-1, 5-bisphosphate carboxylase, *Alocasia macrorrhiza*, 148
Photorespiration, subcellular ATP/ADP ratios, barley protoplasts, 69
Photosynthesis
atrazine resistance, isonuclear rapeseed, 1195
C_4, leaf age, *Flaveria trinervia*, 125
carbon dioxide concentration, rubisco activity, soybean leaves, 1310
carbon dioxide-induced oscillations, fluorescence, spinach, 1125
chloroplast osmotic adjustment, water stress effects, spinach, 200
communication between mesophyll and stomata, cotton, 1058
composition of stable carbon isotopes, air pollutants, conifer trees, 218
depression, acidic fog and ambient ozone, green pepper, 477
efficiency, steady-state fluorescent yield, spinach, 158
explorations of water oxidizing system, 1
histochemical compartmentation, *Crassula falcata*, 633
limits of crop productivity, wheat, 869
metabolite diffusion into bundle sheath cells, C_4 plants, 815
ozone effects, wheat, 1115
salinity effects, carbon allocation, red alga, 690
sodium requirement, cyanobacteria, 757
temperature pretreatment in dark, effects, spinach chloroplast, 207
water deficit effects, orange, 375
Photosystem I
ferredoxin cross-linking to 22-kDa subunit, spinach, 810
structural aspects, *Dunaliella salina*, 1201
Photosystem II
chloroplast, anion action in water oxidation, pokeweed, 194
energy conversion, algae, 923
immunological detection, guard cells, broad bean, 518
site of inhibition, disulfiram, thylakoid membranes, 1021
Phototropisms, pulse-induced, oat and maize coleoptiles, 823
Phycobiliprotein
mRNA synthesis, photoreversible light effects, *Fremyella diplosiphon*, 1084
transcript accumulation, light acclimation, *Fremyella diplosiphon*, 1077
Phycomyces blakesleeanus, proton pumping, microsomal membranes, 1163
Phytochrome
control of diamine oxidase, lentil, 1207

Kalanchoë blossfeldiana germination, action spectra, low fluence, 276
-mediated light regulation, nitrate reductase expression, squash cotyledons, 242
-regulated *Arabidopsis thaliana* seedlings, light-harvesting chlorophyll *a/b* protein, 1323
-regulated transcripts in pea, nuclear-cytoplasmic partitioning, 1397
regulation of chlorophyll *a*-apoprotein accumulation, barley, 1246
tumor development, tomato, 1110
Phytolacca americana (*see* Pokeweed)
Pinus densiflora (*see* Akamatsu)
Pinus strobus (*see* Conifer trees)
Pisum sativum (*see* Pea)
Plasmalemma
amino acid transport in zucchini, 487
sucrose transport, membrane protein, soybean cotyledons, 1435
Plasma membrane
ATPase
phosphoenzyme reaction states, beet, 77
transient kinetics, beet, 84
carrot proteins, 444
corn root, ATPase inhibition, *Cercospora beticola*, 429
H^+-ATPase, inorganic phosphate, red beet, 1073
rye, comparative spin-label study, 1388
Plasmodesmatal function, metabolite diffusion into bundle sheath cells, C_4 plants, 815
Plastids
nongreen, envelope membranes, preparation, 709
photooxidation, transcription inhibition of encoded genes, rye, 255
regulation of chlorophyll *a*-apoprotein accumulation, barley, 1246
starchless mutant of tobacco, phosphoglucomutase, 838
Plumbago zeylanica, male germ unit polypeptides, mature pollen grains, 764
Pokeweed, anion action in water oxidation, 194
Pollen
Papaver dubium, dessication tolerance, development in anther, 626
Plumbago zeylanica, male germ unit polypeptides, 764
wheat, male gametophytes, protein patterns, 969
Polyamines
effect of hormone treatment, growth bud formation, tobacco leaf explant, 600
relation to growth, carrot cell cultures, 224
Polypeptides, salt stress in membrane fractions, barley roots, 1263
Polysomes, water deficit-induced changes, soybean hypocotyls, 289
Portulacaria afra, induction of crassulacean acid metabolism, carbon dioxide levels, 183
Potassium
channel, motor cells, *Samanea saman*, 643
charge balance, nitrate-fed soybean, 605
sodium and
compartmentation, lettuce, 1279
compartmentation, *Spergularia marina* roots, 1274
Potato
appearance of wound-response proteins, hypoxic stress, 805
cell wall-associated acid phosphatase activity, effects, multivalent cations, 61
mitochondria, nicotinamide nucleotide transhydrogenase, 303
regulation of phosphorylation, mitochondrial pyruvate dehydrogenase complex, 1031
temperature effect, starch synthesis, amyloplasts, 1222
Powdery mildew, calcium transport, protoplasts, barley *ml-o* mutants, 1157
Prolamines, structure and expression, rice seed, 649
Proteases, soybean, 355
Protein
changes in synthesis, chilling, tomato, 454
chromoplast-specific, pepper, 42
gene control, iron efficiency, tomato, 785
hormonal regulation of α-amylase expression, barley aleurone layers, 588
inorganic carbon accumulation, *Chlamydomonas reinhardtii*, 491
loading into vacuole, *Chara australis*, 1092
membrane, iron stress, *Anacystis nidulans*, 497
patterns, immature pollen grains, wheat, 969
spermidine binding, thin-layer tobacco tissue culture, 996
23- to 25-kDa group, gene expression, developing maize embryos, 564
Proteinase, germinating barley, 1454
Protein factor, membrane insertion, thylakoid precursor protein, pea, 1146
Protein kinase, calcium-dependent, membrane fractions, beet, 164
Protogonyaulax tamarensis, paralytic shellfish toxins, axenic culture, 1285
Proton pump
Arum maculatum mitochondria, 987
electrogenic, growth, oat coleoptile, 131
Protons
cotransports in corn roots, surface pH, 1469
extrusion by wheat roots, aluminum toxicity symptoms, 418
Protoplasts
barley, photorespiration, subcellular ATP/ADP ratios, 69
barley *ml-o* mutants, calcium transport, powdery mildew, 1157
corn, heat shock response, 965
Jerusalem artichoke tubers, sucrose synthase, 239
pea leaf, photorespiratory metabolism, NADPH-dependent hydroxypyruvate reductase, 1182
rice, viability, isolation process, 26
Prunus, wood, nonbacterial ice nuclei, 915
Pseudomonas syringae, -tolerant oats, tabtoxinine-β-lactam-insensitive leaf glutamine synthetases, 333
Pseudotsuga menziesii (*see* Conifer trees; *see also* Douglas fir)
Pulvini, barley, dark pretreatment, gravistimulation and hormones, 10
Pumpkin
callus, ascorbate oxidase protein, copper, 656
seed, properties, small basic peptide, 770
Pyrophosphate, activity, carbohydrate metabolism, soybean, 862
Pyrus communis (*see* Pear)
Pyruvate, adenylate nucleotide levels, maize mesophyll chloroplasts, 1461
Pyruvate dehydrogenase complex, regulation of activity, plant mitochondria, 1026

R

Rachis, fragment for long-term *in vitro* culture, wheat grains, 409
Radish
cotyledons, cytosolic glutamine synthetase, senescing leaves, 1430
early phases of seed germination, changes, calmodulin and inhibitor, 910
Rapeseed
acyl coenzyme A preference, glycerol phosphate pathway, microsomes, 56
isonuclear, atrazine resistance, photosynthesis, 1195
Raphanus sativus (*see* Radish)
Respiration, capacity, soybean and pea, 528
Rhizobium meliloti, nodulation genes, inducers and inhibitors, alfalfa root, 396
Rhizophora mangle, catastrophic xylem dysfunction, water stress, 574
Ribonucleic acid
bean abscission cellulase, 1257
conversion of glutamate from δ-aminolevulinic acid, *Synechocystis* extracts, 1358
hormonal regulation of α-amylase expression, barley aleurone layers, 588
phytochrome-regulated transcripts in pea, nuclear-cytoplasmic partitioning, 1397
rapid changes, reduction of turgor, pea leaf, 401
translatable, water deficit-induced changes, soybean hypocotyls, 289
Ribonucleic acid, messenger
abscisic acid-induced gene expression, tomato leaf, 1210
circadian control of accumulation, chloroplast proteins, pea, 21
ethylene-inducible gene expression, tomato fruit, 370
gene expression in developing maize embryos, abscisic acid regulation, 23- to 25-kDa proteins, 564
hordein gene expression, low protein barley cultivar, 450
light-harvesting chlorophyll *a/b*-binding protein, tobacco, 1104
phycobiliprotein synthesis, photoreversible light effects, *Fremyella diplosiphon*, 1084
synthesis of zein protein, transgenic petunia plants, 1002
transcription inhibition of encoded genes, plastid photooxidation, rye, 255
Ribulose 1,5-bisphosphate, carbon dioxide concentration and, photosynthesis, soybean leaves, 1310
Ribulose 1,5-bisphosphate carboxylase
characterization, photoautotrophic suspension cultures, *Amaranthus* and cotton, 1297
irradiance effects
methyl viologen treatment, spinach leaves, 850
regulation, *Alocasia macrorrhiza*, 148
inhibition by bicarbonate, wheat, 462
Ribulose 1,5-bisphosphate carboxylase/oxygenase, carbon dioxide fixation rate and, *Aphanothece halophytica*, 1120
Rice
deepwater, elongation growth, internodes, 361

protoplasts, viability, isolation process, 26
seed, prolamines, structure and expression, 649
Ricinus communis (*see* Castor bean)
Ripening
cell wall autolysis, tomato, 1031
inhibition of, ethanol, tomato fruit, 143
Root
alfalfa
inducers and inhibitors, *Rhizobium meliloti* nodulation genes, 396
nodulin gene expression, 321
auxin resistance, membrane-bound auxin binding protein, tobacco, 845
Azolla filiculoides, toxic effects, heavy metals, 30
barley, salt stress, membrane polypeptide changes, 1263
barley seedling, nitrate transport, plasma membrane nitrate reductase, 1141
bean, NADH-dependent glutamate synthase, 1411
corn
ATPase inhibition, *Cercospora beticola*, 429
ethylene production, nitrogenase activity, 115
H^+ cotransports, surface pH, 1469
hexose transport system, 1015
cotton, glucose incorporation, cell wall polysaccharides, 511
formation, aged wheat embryos, 983
lettuce, sodium and potassium compartmentation, 1279
sorghum, ethylene production, nitrogenase activity, 115
soybean, occurrence, self-regulatory response, 537
Spergularia marina, sodium and potassium compartmentation, 1274
wheat, proton extrusion, aluminum toxicity symptoms, 418
Rubisco activase, purification and assay, spinach leaves, 1008
Rubisco (*see* Ribulose 1,5-bisphosphate carboxylase/oxygenase)
Russet spotting, hormone interaction, phenolic metabolism, lettuce, 1136
Rye
inhibition of transciption, encoded genes, plastid photooxidation, 255
plasma membranes, comparative spin-label study, 1388
Ryegrass, turf, nitrogen assimilation, 1303

S

Salicylic acid, inhibition of ethylene biosynthesis, pear, 833
Salinity
carbon dioxide fixation rate, rubisco content, *Aphanothece halophytica*, 1120
effects on photosynthesis, carbon allocation, red alga, 690
stress, inhibited leaf expansion, bean, 233
Salt
indole-3-acetic acid loss, tissue culture media, muskmelon, 379
shock, heat and, tobacco cells, 618
stress, membrane polypeptide changes, barley roots, 1263
Samanea saman, potassium channels in motor cells, 643
Secale cereale (*see* Rye)
Seed
corn
acyl coenzyme A preference, glycerol phosphate pathway, 56
sugars, dessication tolerance, 829
Kalanchoë blossfeldiana, germination, action spectra, 276
palm, acyl coenzyme A preference, glycerol phosphate pathway, 56
pea, sugars, dessication tolerance, 829
pumpkin, properties, small basic peptide, 770
radish, germination, calmodulin levels, 910
rapeseed, acyl coenzyme A preference, glycerol phosphate pathway, 56
rice, prolamines, structure and expression, 649
soybean, sugars, dessication tolerance, 829
Seedling
Arabidopsis thaliana, light-harvesting chlorophyll *a/b* protein, 1323
barley root, nitrate transport, plasma membrane nitrate reductase, 1141
corn
endogenous gibberellins, 1367
wall-localized peroxidases, monoclonal antibody production, 1446
lentil, phytochrome control, diamine oxidase, 1207
pea, norflurazon-treated, light effects, 340
Phalaris aquatica, *N,N*-dimethyltryptamine production, 315
tomato, dark-grown, indole-3-acetic acid, 780
Selenastrum minutum, steady-state fluorescence, ammonium assimilation, 97
Senescence
cytosolic glutamine synthetase and mRNA, radish cotyledons, 1430
-related changes in carnation petals, ATP-dependent uptake, calcium, 295
soybean leaf, cytokinin biochemistry, 788
Sesquiterpene cyclase, regulation of isoprenoid metabolism, tobacco, 1291
Shellfish, paralytic toxins, *Protogonyaulax tamarensis*, 1285
Shoot
navel orange, endogenous gibberellins, 639
pea, turgor reduction, RNA changes, 401
pennycress tip, site of perception, thermoinductive temperature, 424
Vitis vinifera, resistance, water transport, 718
Sirenin, effects on chemotaxis, *Allomyces macrogynus*, 139
Skeletonema costatum, energy conversion, photosystem II, 923
Sodium
potassium and
compartmentation, lettuce, 1279
compartmentation, *Spergularia marina* roots, 1274
requirement in cyanobacterial photosynthesis, 757
Sodium chloride (*see also* Salt)
glucose incorporation, cell wall polysaccharides, cotton roots, 511
Solanum tuberosum (*see* Potato)
Solute, import, growth and, pea epicotyls, 1240
Sorghum, excised roots, ethylene production, nitrogenase activity, 115
Soybean
alterations in leaf carbohydrate metabolism, response, nitrogen stress, 725
carbohydrate metabolism, pyrophosphate activity, 862
cotyledons, membrane protein, sucrose transport, 1435
enzymes of phosphatidylcholine synthesis, 1338
hypocotyls, water deficit, abscisic acid, 289
leaf, carbon dioxide concentration, rubisco activity, 1310
leaf senescence, cytokinin biochemistry, 788
nitrate-fed, charge balance, 605
nitrite conversion to nitrogen oxide, NADPH-nitrate reductase enzyme, 389
occurrence of alternative respiratory capacity, 528
phosphatidylcholine synthesis, 854
proteolytic activities, Kunitz trypsin inhibitor, glycinin, 355
root, occurrence, self-regulatory response, 537
seed, sugars, dessication tolerance, 829
sucrose phosphate synthase activity, phytochrome-mediated regulation, maize, 540
transformation of cells, mixed *Agrobacterium tumefaciens* strains, phenolic compounds, 570
Spergularia marina, sodium and potassium compartmentation, transport across roots, 1274
Spermidine, binding protein, thin-layer tobacco tissue culture, 996
Spinach
carbon dioxide-induced oscillations, fluorescence, photosynthesis, 1125
chloroplast osmotic adjustment, photosynthesis, water stress effects, 200
chloroplasts
characterization, elemental sulfur, 961
glutamine transport, translocator, 1048
light energy, nitrite photoassimilation, 1373
temperature pretreatment, dark, 207
ferredoxin cross-linking, 22-kDa subunit, photosystem I, 810
irradiance and methyl viologen treatment, ribulose bisphosphate carboxylase, leaf, 850
leaf, purification and assay, rubisco activase, 1008
leaf isozymes, dihydroxyacetone phosphate reductase, *Dunaliella* chloroplasts, 896
oxygen-18 and deuterium labeling studies, choline oxidation, 695
steady-state fluorescent yield, photosynthetic efficiency, 158
thylakoid membranes, inhibition, disulfiram, 1021
Spinacia oleracia (*see* Spinach)
Spin-label, comparative study, rye plasma membranes, 1388
Squalene synthetase, regulation of isoprenoid metabolism, tobacco, 1291
Squash, phytochrome-mediated light regulation, nitrate reductase expression, cotyledons, 242
Starch
carbon isotope discrimination, C_3 plants, 1418
deficient mutant of *Arabidopsis thaliana*, ADPglucose pyrophosphorylase, 1175
phosphorylase inhibitor, β-amylase, sweet potato, 1154

starchless mutant of tobacco, modified plastid phosphoglucomutase, 838
synthesis in potato tuber tissue, temperature effects, 1222
Starvation, tolerance, mechanisms of, millet, 1381
Stem
akamatsu, abscisic acid, ion monitoring, 525
pea epicotyls, growth and solute import, 1240
Sterol, changes in alfalfa, light effects, 1403
Stomata, abscisic acid as inhibitor, transpiration stream, wheat plants, 703
Sucrose
dessication tolerance of *Papaver dubium* pollen, development in anther, 626
malate exportation and, pea fruit, 466
tonoplast stability and survival, vacuoles, different buffers, 251
transport into developing soybean cotyledons, membrane protein, 1435
Sucrose phosphate synthase, phytochrome-mediated regulation, maize, 540
Sucrose synthase
protoplasts of Jerusalem artichoke tubers, 239
shrunken-1 kernels of maize, 1219
Sugar
carbohydrate metabolism in soybean, pyrophosphate activity, 862
carbon isotope discrimination, C_3 plants, 1418
dessication tolerance and, seed of pea, corn and soybean, 829
starchless mutant of tobacco, modified plastid phosphoglucomutase, 838
uptake, maize endosperm suspension cultures, 1235
Sugarcane
incubation of vacuoles with UDP-glucose, reevaluation, disaccharides, 266
reaction products from UDP-glucose, vacuoles, 259
Sulfate, regulation of assimilation by cadmium, corn, 1407
Sulfur, elemental, characterization, spinach chloroplasts, 961
Sulfur dioxide, low levels, translocation of assimilates, Douglas fir, 559
Sunflower, gravitropism, 1186
Superoxide dismutase, intraorganellar distribution, peroxisomes, pea and watermelon, 1215
Sweet potato, starch phosphorylase inhibitor, β-amylase, 1154
Sycamore
amyloplast inner envelope, ATPase characterization, 119
intracellular sites of synthesis and storage, 1-(malonylamino)cyclopropane-1-carboxylic acid, 613
preparation of envelope membranes, nongreen plastids, 709
Synechococcus, 42-kDa polypeptide role, inorganic carbon uptake, 284
Synechococcus leopoliensis, sodium requirement for photosynthesis, 757
Synechococcus UTX 625, rate of O_2 photoreduction, active transport, inorganic carbon, 6
Synechocystis, δ-aminolevulinic acid formation from glutamate, tRNA requirement, 1358

T

Tabtoxinine-β-lactam, -insensitive leaf glutamine synthetases, pathogen tolerance, oat, 333
Temperature
effects on starch synthesis, amyloplasts, potato, 1222
heat shock response, maize protoplasts, 965
pretreatment in dark, photosynthesis, spinach chloroplasts, 207
thermoinductive, site of perception, pennycress, 424
transport properties, tomato fruit tonoplast, 1097
Tetrapyrrole
inhibitor of synthesis, 4-amino-5-hexynoic acid, various plants, 747
pigment precursors, biosynthesis of, *Chlorella vulgaris*, 879
Thalassiosira, energy conversion, photosystem II, 923
Thalictrum rugosum, L-tyrosine decarboxylase, elicitor-induced, suspension cultures, 46, 52
Thiamine
-requiring mutant, *Arabidopsis thaliana*, 248
-reversible defect in synthesis, tobacco chloroplast pigments, 930
Thiamine pyrophosphate, regulation of pyruvate dehydrogenase complex, pea and potato, 1031
Thlaspi arvense (*see* Pennycress)
Thuja occidentalis, catastrophic xylem dysfunction, water stress, 574
Thylakoid membranes
precursor protein, soluble protein factor, pea, 1146
spinach
inhibition, disulfiram, 1021
regulation, transient photosynthesis, 1125
Thylakoids, oat, development, galactolipid asymmetry, 412
Timothy, fructan in grass leaf blades, 1349
Tobacco
auxin resistance, lack of membrane-bound auxin-binding protein, 845
callus cultures, refined technique, electrical current application, 515
effect of hormone treatment, growth bud formation, putrescine levels, 600
ethylene production, speed of yellowing, curing, 329
glyphosate tolerance, 661
interaction of heat and salt shock, 618
light-harvesting chlorophyll *a*/*b*-binding protein, diurnal and circadian rhythms, 1104
membrane-bound auxin-binding protein, solubilization, characterization, 685
nitrate reductase gene expression, 383
organ-specific and developmental regulation, nopaline synthase promoter, 547
polar transport of 1-naphthaleneacetic acid, flower bud distribution, 752
regulation of isoprenoid metabolism, 1291
spermidine binding protein, 996
starchless mutant, modified plastid phosphoglucomutase, 838
thiamine-reversible defect in synthesis, chloroplast pigments, 930
Tomato
cell wall autolysis, stimulation of ripening, 1031
changes in protein synthesis, chilling, 454
dark-grown seedlings, indole-3-acetic acid, 780
ethylene-inducible gene expression, 370
ethylene overproducing mutant, characterization, 774
fruit development, chromoplasts, DNA methylation, 16
fruit ripening, applied ethanol, 143
fruit tonoplast, transport properties, 1097
green leaves and cotyledons, immunocytolocalization, glutamine synthetase, 943
inactivation and radiolabeling, 1-aminocyclopropane-1-carboxylate synthase, 109
involvement of phytochrome, tumor development, 1110
iron efficiency, gene control, proteins, 785
leaf, abscisic acid-induced gene expression, 1210
nitrate reductase gene expression, 383
stable carbon isotope composition, water use efficiency, 213
xanthoxin metabolism, cell-free preparations, 178
Tonoplasts
barley, stability and survival, different buffers, 251
tomato fruit, transport properties, 1097
Toxins, shellfish, paralysis, *Protogonyaulax tamarensis*, 1285
Tracheary elements, 4-coumarate:coenzyme A ligase and isoperoxidase, expression, zinnia mesophyll cells, 679
Transpiration, stream, abscisic acid as stomatal inhibitor, wheat plants, 703
Trifluoroleucine, phase shift of circadian rhythm, *Lemna gibba*, 953
Trypsin, Kunitz inhibitor, proteolytic activity, soybean, 355
L-Trytophan, endogenous inhibitor of embryo germination, white wheat, 435
Tumor, development, phytochrome involvement, tomato, 1110
Turgor
inhibited leaf expansion, salinity stress, bean, 233
reduction of, changes in pea shoot RNA, 401
L-Tyrosine decarboxylase, elicitor-induced, suspension cultures, *Eschscholtzia californica* and *Thalictrum rugosum*, 46, 52

U

UDP-glucose, analysis of reaction products, vacuoles, sugarcane, 259, 266
Ultraviolet light, A/B protecting pigment, *Nostoc commune*, 1055
Uranium, localization and toxic effects, *Azolla filiculoides*, 30
Urea, charge balance, nitrate-fed soybean, 605
Uridine-5′-diphosphoglucose, enzymic synthesis, indole-3-acetyl-1-*O*-β-D-glucose, 1474, 1481
Urochloa panicoides, metabolite diffusion into bundle sheath cells, 815

V

Vacuole
protein loading, *Chara australis*, 1092

proton pumping, microsomal membranes, *Phycomyces blakesleeanus*, 1163
reaction products from UDP-glucose, sugarcane, 259, 266
sycamore, intracellular sites, synthesis and storage, 613
tonoplast stability and survival, different buffers, barley, 251
Vallisneria gigantea, protoplasts from mesophyll cells, light-affected Ca^{2+} fluxes, 228
Vanadate, ATPase inhibition by *Cercospora beticola*, corn root membrane vesicles, 429
Vicia faba (*see* Broad bean)
Victorin, biological activity, 37
Vigna radiata (*see* Mung bean)
Vitis vinifera, resistance to water transport in shoots, 718

W

Water
deficit, photosynthesis effects, orange, 375
deficit-induced changes in abscisic acid, translatable RNA, soybean hypocotyls, 289
explorations of oxidizing system, 1
oxidation system, anion action, pokeweed, 194
transpiration stream of wheat plants, abscisic acid, stomatal inhibitor, 703
transport in shoots, resistance, *Vitis vinifera*, 718
use efficiency, stable carbon isotope composition, tomato, 213
Watermelon, superoxide dismutase in peroxisomes, intraorganellar distribution, 1215
Water stress
abscisic acid-induced gene expression, tomato leaf, 1210
catastrophic xylem dysfunction, woody plants, 574
chloroplast osmotic adjustment, photosynthesis effects, spinach, 200
-induced xylem embolism, mechanism of, 574
induction of crassulacean acid metabolism, carbon dioxide levels, *Portulacaria afra*, 183
Wheat
abscisic acid as stomatal inhibitor, transpiration stream, wheat plants, 703
embryo germination, endogenous inhibitor, L-tryptophan, 435
embryos, deteriorated, root formation, 983
fructan in grass leaf blades, 1349
grains, long-term *in vitro* culture, 409
inhibition of ribulose-1,5-bisphosphate carboxylase, bicarbonate, 462
limits of crop productivity, 869
localization of germ lysozyme, cell wall interaction, 1317
male gametophytes, protein patterns, 969
ozone effects on photosynthesis, 1115
phosphorylation of eIF-4F germ kinase, 483
root, proton extrusion, aluminum toxicity symptoms, 418
Wood
conifer tree, composition of stable carbon isotopes, air pollutants, 218
Prunus, nonbacterial ice nuclei, 915
Wound, -response proteins, hypoxic stress, potato, 805

X

Xanthine oxidoreductase inhibitor, allopurinol, nodule function, cowpea, 1229
Xanthoxin, metabolism in cell-free preparations, tomato, 178
Xylem
catastrophic dysfunction, water stress, woody plants, 574
embolism, water stress-induced, mechanism of, 574

Z

Zea mays (*see* Corn)
Zeatin, inhibition of somatic embryogenesis, orchardgrass, 990
Zein, synthesis of protein, transgenic petunia plants, 1002
Zinnia
kinetics of determination in differentiation, mesophyll cells, tracheary elements, 92
mesophyll cells, 4-coumarate:coenzyme A ligase, isoperoxidase expression, 679
Zucchini, membrane vesicles, amino acid transport, 487

Volume Contents

Number 1. September

REVIEW

1 **Explorations in the "Inner Sanctum of the Photosynthetic Process," the Water Oxidizing System**—Peter H. Homann

COMMUNICATIONS

6 **Active Transport of Inorganic Carbon Increases the Rate of O_2 Photoreduction by the Cyanobacterium *Synechococcus* UTEX 625**—Anthony G. Miller*, George S. Espie, and David T. Canvin

10 **Effect of Dark Pretreatment on the Kinetics of Response of Barley Pulvini to Gravistimulation and Hormones**—Thomas G. Brock* and Peter B. Kaufman

13 **Oxidative Decarboxylation of Branched-Chain 2-Oxo Fatty Acids by Higher Plant Peroxisomes**—Heidrun Gerbling and Bernt Gerhardt*

16 **DNA Methylation Occurred around Lowly Expressed Genes of Plastid DNA during Tomato Fruit Development**—Jarunya Ngernprasirtsiri, Hirokazu Kobayashi, and Takashi Akazawa*

ARTICLES

21 **Circadian Control of the Accumulation of mRNAs for Light- and Heat-Inducible Chloroplast Proteins in Pea (*Pisum sativum* L.)**—Beate Otto, Bernhard Grimm, Peter Ottersbach, and Klaus Kloppstech*

26 **Factors Influencing Protoplast Viability of Suspension-Cultured Rice Cells during Isolation Process**—Shigetaka Ishii

30 **Localization and Toxic Effects of Cadmium, Copper, and Uranium in *Azolla***—Mordechai Sela, Elisha Tel-Or*, Eberhardt Fritz, and Aloys Huttermann

37 **Molecular Features Affecting the Biological Activity of the Host-Selective Toxins from *Cochliobolus victoriae***—T. J. Wolpert, V. Macko*, W. Acklin, and D. Arigoni

42 **Chromoplast-Specific Proteins in *Capsicum annuum***—Nouréddine Hadjeb, Ioannis Gounaris, and Carl A. Price*

46 **Elicitor-Induced L-Tyrosine Decarboxylase from Plant Cell Suspension Cultures. I. Induction and Purification**—Ivano A. Marques and Peter E. Brodelius*

52 **Elicitor-Induced L-Tyrosine Decarboxylase from Plant Cell Suspension Cultures. II. Partial Characterization**—Ivano A. Marques and Peter E. Brodelius*

56 **Acyl Coenzyme A Preference of the Glycerol Phosphate Pathway in the Microsomes from the Maturing Seeds of Palm, Maize, and Rapeseed**—Chao Sun, Yi-zhi Cao, and Anthony H. C. Huang*

61 **Effects of Multivalent Cations on Cell Wall-Associated Acid Phosphatase Activity**—Shu-I Tu*, Janine N. Brouillette, Gerald Nagahashi, and Thomas F. Kumosinski

69 **Influence of Photorespiration on ATP/ADP Ratios in the Chloroplasts, Mitochondria, and Cytosol, Studied by Rapid Fractionation of Barley (*Hordeum vulgare*) Protoplasts**—Per Gardeström* and Bosse Wigge

77 **Chemical Equivalence of Phosphoenzyme Reaction States in the Catalytic Mechanism of the Red Beet (*Beta vulgaris* L.) Plasma Membrane ATPase**—Donald P. Briskin

1031 **Regulation of the Phosphorylation of Mitochondrial Pyruvate Dehydrogenase Complex *in Situ*. Effects of Respiratory Substrates and Calcium**—Raymond J. A. Budde, Tung K. Fang, and Douglas D. Randall*

1037 **Products Released from Enzymically Active Cell Wall Stimulate Ethylene Production and Ripening in Preclimacteric Tomato (*Lycopersicon esculentum* Mill.) Fruit**—Jeffrey K. Brecht* and Donald J. Huber

1042 **L-Glutamate-Dependent Medium Alkalinization by *Asparagus* Mesophyll Cells. Cotransport or Metabolism**—Steve L. McCutcheon, Bruce W. Ciccarelli, Induk Chung, Barry Shelp, and Alan W. Bown*

1048 **Glutamine Transport and the Role of the Glutamine Translocator in Chloroplasts**—Jianwei Yu and K. C. Woo*

1055 **A New UV-A/B Protecting Pigment in the Terrestrial Cyanobacterium *Nostoc commune***—S. Scherer, T. W. Chen, and P. Böger*

1058 **Correlation of Stomatal Conductance with Photosynthetic Capacity of Cotton Only in a CO_2-Enriched Atmosphere: Mediation by Abscisic Acid?**—John W. Radin*, Wolfram Hartung, Bruce A. Kimball, and Jack R. Mauney

1063 **Promoter Strength Comparisons of Maize Shrunken 1 and Alcohol Dehydrogenase 1 and 2 Promoters in Mono- and Dicotyledonous Species**—R. M. Hauptmann, M. Ashraf, V. Vasil, L. C. Hannah, I. K. Vasil*, and R. Ferl

1067 **The Role of Nitrate and Ammonium Ions and Light on the Induction of Nitrate Reductase in Maize Leaves**—Ann Oaks*, Michel Poulle, Valerie J. Goodfellow, Leslie A. Cass, and Holger Deising

1073 **Effects of Inorganic Phosphate on the Plasma Membrane H^+-ATPase from Red Beet (*Beta vulgaris* L.)**—Luis E. González de la Vara* and Guadalupe Medina

1077 **Changes in Accumulation and Synthesis of Transcripts Encoding Phycobilisome Components during Acclimation of *Fremyella diplosiphon* to Different Light Qualities**—R. Oelmüller*, P. B. Conley, N. Federspiel, W. R. Briggs, and A. R. Grossman

1084 **Photoreversibility of the Effect of Red and Green Light Pulses on the Accumulation in Darkness of mRNAs Coding for Phycocyanin and Phycoerythrin in *Fremyella diplosiphon***—R. Oelmüller*, Arthur R. Grossman, and W. R. Briggs

1092 **Degradation of Proteins Artifically Introduced into Vacuoles of *Chara australis***—Yuji Moriyasu* and Masashi Tazawa

1097 **Transport Properties of the Tomato Fruit Tonoplast. III. Temperature Dependence of Calcium Transport**—Daryl C. Joyce, Grant R. Cramer, Michael S. Reid, and Alan B. Bennett*

1104 **Diurnal and Circadian Rhythms in the Accumulation and Synthesis of mRNA for the Light-Harvesting Chlorophyll *a/b*-Binding Protein in Tobacco**—Harald Paulsen and Lawrence Bogorad*

1110 **Evidence for Involvement of Phytochrome in Tumor Development on Plants**—Robert C. Morrow* and Theodore W. Tibbitts

1115 **The Regulation of Photosynthesis in Leaves of Field-Grown Spring Wheat (*Triticum aestivum* L., cv Albis) at Different Levels of Ozone in Ambient Air**—Berchtold Lehnherr*, Felix Mächler, Ariane Grandjean, and Jürg Fuhrer

1120 **CO_2 Fixation Rate and RuBisCO Content Increase in the Halotolerant Cyanobacterium, *Aphanothece halophytica*, Grown in High Salinities**—Tetsuko Takabe*, Aran Incharoensakdi, Keita Arakawa, and Sadaki Yokota

1125 **Carbon Dioxide-Induced Oscillations in Fluorescence and Photosynthesis. Role of Thylakoid Membrane Energization in Regulation of Photosystem II Activity**—Richard B. Peterson*, Mirta N. Sivak, and David A. Walker

1131 **Heath Shock Enhances the Synthesis of a Lectin-Related Protein in *Dolichos biflorus* Cell Suspension Cultures**—Joanne P. Spadoro-Tank and Marilynn E. Etzler*

1136 **Plant Hormone Interaction and Phenolic Metabolism in the Regulation of Russet Spotting in Iceberg Lettuce**—Dangyang Ke and Mikal E. Saltveit, Jr.*

1141 **Inhibition of Nitrate Transport by Anti-Nitrate Reductase IgG Fragments and the Identification of Plasma Membrane Associated Nitrate Reductase in Roots of Barley Seedlings**—Michael R. Ward, Rudolf Tischner, and Ray C. Huffaker*

1146 **A Soluble Protein Factor is Required *in Vitro* for Membrane Insertion of the Thylakoid Precursor Protein, pLHCP**—Donald R. Fulson and Kenneth Cline*

1154 **Starch Phosphorylase Inhibitor Is β-Amylase**—Shu-Mei Pan, Tsung-Chain Chang, Rong-Huay Juang, and Jong-Ching Su*

1157 **Calcium Transport in Protoplasts Isolated from *ml-o* Barley Isolines Resistant and Susceptible to Powdery Mildew**—Anne F. Wrona*, Roger M. Spanswick, and James R. Aist

1163 **Anion-Sensitive Mg^{2+} ATP-Dependent Proton Pumping in Microsomal Membranes from *Phycomyces blakesleeanus* Bgff.**—Thomas Rausch*, Sigrid Soffel, and Willy Hilgenberg

1168 **Evidence for Precursor Forms of the Low Isoelectric Point α-Amylase Isozymes Secreted by Barley Aleurone Cells**—John V. Jacobsen*, Douglas S. Bush, Lilianne Sticher, and Russell L. Jones

1175 **A Starch Deficient Mutant of *Arabidopsis thaliana* with Low ADPglucose Pyrophosphorylase Activity Lacks One of the Two Subunits of the Enzyme**—Tsan-Piao Lin, Timothy Caspar, Chris R. Somerville, and Jack Preiss*

1182 **Subcellular Location of NADPH-Dependent Hydroxypyruvate Reductase Activity in Leaf Protoplasts of *Pisum sativum* L. and Its Role in Photorespiratory Metabolism**—Leszek A. Kleczkowski, Curtis V. Givan*, Jacqueline M. Hodgson, and Douglas D. Randall

1186 **Gravitropism in Higher Plant Shoots. V. Changing Sensitivity to Auxin**—Frank B. Salisbury*, Linda Gillespie, and Patricia Rorabaugh

1195 **Determination of the Rate Limiting Step for Photosynthesis in a Nearly Isonuclear Rapeseed (*Brassica napus* L. Biotype Resistant to Atrazine**—Paul A. Jursinic* and Robert W. Pearcy

1201 **Structural Aspects of Photosystem I from *Dunaliella salina***—Barry D. Bruce and Richard Malkin*

1207 **Phytochrome-Mediated Control of Diamine Oxidase Level in the Epicotyl of Etiolated Lentil (*Lens culinaris* Medicus) Seedlings**—Riccardo Angelini, Rodolfo Federico*, and Alberto Mancinelli

1210 **Drought- and ABA-Induced Changes in Polypeptide and mRNA Accumulation in Tomato Leaves**—Elizabeth A. Bray

1215 **Intraorganellar Distribution of Superoxide Dismutase in Plant Peroxisomes (Glyoxysomes and Leaf Peroxisomes)**—Luisa M. Sandalio and Luis A. Del Río*

1219 ***Shrunken-1* Encoded Sucrose Synthase Is Not Required for Sucrose Synthesis in the Maize Endosperm**—B. Greg Cobb* and L. Curtis Hannah

1222 **Effect of Temperature on Starch Synthesis in Potato Tuber Tissue and in Amyloplasts**—Gangaram Mohabir and Philip John*

1229 **Inhibition of Nodule Functioning in Cowpea by a Xanthine Oxidoreductase Inhibitor, Allopurinol**—Craig A. Atkins*, Paul J. Sanford, Paul J. Storer, and John S. Pate

1235 **Sugar Uptake by Maize Endosperm Suspension Cultures**—Frederick C. Felker* and James C. Goodwin

1240 **Growth Inhibition, Turgor Maintenance, and Changes in Yield Threshold after Cessation of Solute Import in Pea Epicotyls**—Judy Gougler Schmalstig* and Daniel J. Cosgrove

1246 **Light-Dependent Accumulation of Radiolabeled Plastid-Encoded Chlorophyll *a*-Apoproteins Requires Chlorophyll *a*. I. Analysis of Chlorophyll-Deficient Mutants and Phytochrome Involvement**—Robert R. Klein, Patricia E. Gamble, and John E. Mullet*

1257 **Bean Abscission Cellulase. Characterization of a cDNA Clone and Regulation of Gene Expression by Ethylene and Auxin**—Mark L. Tucker*, Roy Sexton, Elena del Campillo, and Lowell N. Lewis

1263 **The Effects of Salt Stress on Polypeptides in Membrane Fractions from Barley Roots**—William J. Hurkman*, Charlene K. Tanaka, and Frances M. DuPont

1274 **Sodium and Potassium Compartmentation and Transport across the Roots of Intact *Spergularia marina***—Dennis Lazof* and John M. Cheeseman

1279 **Sodium and Potassium Compartmentation and Transport in the Roots of Intact Lettuce Plants**—Dennis Lazof* and John M. Cheeseman

1285 **Paralytic Shellfish Toxins in *Protogonyaulax tamarensis* and *Protogonyaulax catenella* in Axenic Culture**—Barbara A. Boczar*, Mark K. Beitler, John Liston, John J. Sullivan, and Rose Ann Cattolico

1291 **Induction of Sesquiterpene Cyclase and Suppression of Squalene Synthetase Activities in Plant Cell Cultures Treated with Fungal Elicitor**—Urs Vögeli and Joseph Chappell*

1297 **Characteristics of Five New Photoautotrophic Suspension Cultures Including Two *Amaranthus* Species and a Cotton Strain Growing on Ambient CO_2 Levels**—Chunhe Xu, L. C. Blair, S. M. D. Rogers, Govindjee, and J. M. Widholm*

1303 **Uptake and Assimilation of NO_3^- and NH_4^+ by Nitrogen-Deficient Perennial Ryegrass Turf**—Daniel C. Bowman* and Jack L. Paul

1310 **Effects of CO_2 Concentration on Rubisco Activity, Amount, and Photosynthesis in Soybean Leaves**—William J. Campbell*, L. H. Allen, Jr., and George Bowes

1317 **Immunocytochemical Localization of a Wheat Germ Lysozyme in Wheat Embryo and Coleoptile Cells and Cytochemical Study of Its Interaction with the Cell Wall**—Patrice Audy, Nicole Benhamou*, Jean Trudel, and Alain Asselin

1323 **Expression of Light-Harvesting Chlorophyll *a*/*b*-Protein Genes Is Phytochrome-Regulated in Etiolated *Arabidopsis thaliana* Seedlings**—George A. Karlin-Neumann, Lin Sun, and Elaine M. Tobin*

1332 **Substrate Utilization by Suspension Cultures and Somatic Embryos of *Daucus carota* L. Measured by ^{13}C NMR**—Cor Dijkema*, Sacco C. de Vries, Hilbert Booij, Tjeerd J. Schaafsma, and Albert van Kammen

1338 **Enzymes of Phosphatidylcholine Synthesis in *Lemna*, Soybean, and Carrot**—Anne H. Datko and S. Harvey Mudd*

1349 **Characterization of Fructan from Mature Leaf Blades and Elongation Zones of Developing Leaf Blades of Wheat, Tall Fescue, and Timothy**—William G. Spollen and Curtis J. Nelson*

1354 **Immunogold Localization of Nitrate Reductase in Maize Leaves**—Kevin C. Vaughn* and Wilbur H. Campbell

1358 **The tRNA Required for *in Vitro* δ-Aminolevulinic Acid Formation from Glutamate in *Synechocystis* Extracts. Determination of Activity in a *Synechocystis in Vitro* Protein Synthesizing System**—Mark A. Schneegurt, Siegfried Rieble, and Samuel I. Beale*

1367 **Qualitative and Quantitative Analyses of Gibberellins in Vegetative Shoots of Normal, *dwarf*-1, *dwarf*-2, *dwarf*-3, and *dwarf*-5 Seedlings of *Zea mays* L.**—Shozo Fujioka, Hisakazu Yamane, Clive R. Spray, Paul Gaskin, Jake MacMillan, Bernard O. Phinney*,

and Nobutaka Takahashi

1373 Spinach Leaf Chloroplast CO_2 and NO_2^- Photoassimilations Do Not Compete for Photogenerated Reductant. Manipulation of Reductant Levels by Quantum Flux Density Titrations—J. Michael Robinson

1381 Mechanisms of Starvation Tolerance in Pearl Millet—Chris Baysdorfer*, Robert D. Warmbrodt, and William J. Van Der Woude

1388 A Comparative Spin-Label Study of Isolated Plasma Membranes and Plasma Membranes of Whole Cells and Protoplasts from Cold-Hardened and Nonhardened Winter Rye—John J. Windle

1397 Nuclear-Cytoplasmic Partitioning of Phytochrome-Regulated Transcripts in *Pisum sativum*—Anurag D. Sagar*, Winslow R. Briggs, and William F. Thompson

1403 Effect of Light on Sterol Changes in *Medicago sativa*—Li-Shar Huang and Claus Grunwald*

1407 Regulation of Assimilatory Sulfate Reduction by Cadmium in *Zea mays* L.—S. Nussbaum, D. Schmutz, and C. Brunold*

1411 Two Isoenzymes of NADH-Dependent Glutamate Synthase in Root Nodules of *Phaseolus vulgaris* L. Purification, Properties, and Activity Changes during Nodule Development—Feng-Ling Chen and Julie V. Cullimore*

1418 Correlation between the Carbon Isotope Discrimination in Leaf Starch and Sugars of C_3 Plants and the Ratio of Intercellular and Atmospheric Partial Pressures of Carbon Dioxide—Enrico Brugnoli*, Kerry T. Hubick, Susanne von Caemmerer, Suan Chin Wong, and Graham D. Farquhar

1425 Synthesis and Biological Activity of an Azido Derivative of Paclobutrazol, an Inhibitor of Gibberellin Biosynthesis—David L. Hallahan, Anthony P. Heasman, Martin C. Grossel, Robert Quigley, Peter Hedden, and John R. Bowyer*

1430 Senescence-Specific Increase in Cytosolic Glutamine Synthetase and Its mRNA in Radish Cotyledons—Naoto Kawakami and Akira Watanabe*

1435 Identification of Membrane Protein Associated with Sucrose Transport Into Cells of Developing Soybean Cotyledons—Kevin G. Ripp, Paul V. Viitanen, William D. Hitz*, and Vincent R. Franceschi

1446 Production and Characterization of Monoclonal Antibodies to Wall-Localized Peroxidases from Corn Seedlings—Sung-Ha Kim, Maurice E. Terry, Pepper Hoops, Marianne Dauwalder, and Stanley J. Roux*

1454 A Proteinase from Germinating Barley. I. Purification and Some Physical Properties of a 30 kD Cysteine Endoproteinase from Green Malt—M. Poulle and Berne L. Jones*

1461 Adenine Nucleotide Levels, Redox State of the NADP System and Assimilatory Force in Nonaqueously Purified Mesophyll Chloroplasts from Maize Leaves under Different Light Intensities—Hideaki Usuda

1469 H^+ Cotransports in Corn Roots as Related to the Surface pH Shift Induced by Active H^+ Excretion—Jean-Baptiste Thibaud, Jean-Claude Davidian, Hervé Sentenac, André Soler, and Claude Grignon*

1474 Enzymic Synthesis of Indole-3-Acetyl-1-*O*-β-D-Glucose. I. Partial Purification and Characterization of the Enzyme from *Zea mays*—Antoni J. Leznicki and Robert S. Bandurski*

1481 Enzymic Synthesis of Indole-3-Acetyl-1-*O*-β-D-Glucose. II. Metabolic Characteristics of the Enzyme—Antoni J. Leznicki and Robert S. Bandurski*

1486 Glycine Supports *in Vivo* Reduction of Nitrate in Barley Leaves—Polumetla A. Kumar, T. V. R. Nair, and Yash P. Abrol*

Volume Contents by Subject

METABOLISM AND ENZYMOLOGY

13 **Oxidative Decarboxylation of Branched-Chain 2-Oxo Fatty Acids by Higher Plant Peroxisomes**—Heidrun Gerbling and Bernt Gerhardt*

46 **Elicitor-Induced L-Tyrosine Decarboxylase from Plant Cell Suspension Cultures. I. Induction and Purification**—Ivano A. Marques and Peter E. Brodelius*

52 **Elicitor-Induced L-Tyrosine Decarboxylase from Plant Cell Suspension Cultures. II. Partial Characterization**—Ivano A. Marques and Peter E. Brodelius*

56 **Acyl Coenzyme A Preference of the Glycerol Phosphate Pathway in the Microsomes from the Maturing Seeds of Palm, Maize, and Rapeseed**—Chao Sun, Yi-zhi Cao, and Anthony H. C. Huang*

61 **Effects of Multivalent Cations on Cell Wall-Associated Acid Phosphatase Activity**—Shu-I Tu*, Janine N. Brouillette, Gerald Nagahashi, and Thomas F. Kumosinski

69 **Influence of Photorespiration on ATP/ADP Ratios in the Chloroplasts, Mitochondria, and Cytosol, Studied by Rapid Fractionation of Barley (*Hordeum vulgare*) Protoplasts**—Per Gardeström* and Bosse Wigge

97 **Steady-State Chlorophyll *a* Fluorescence Transients during Ammonium Assimilation by the N-Limited Green Alga *Selenastrum minutum***—David H. Turpin* and Harold G. Weger

109 ***S*-Adenosylmethionine-Dependent Inactivation and Radiolabeling of 1-Aminocyclopropane-1-Carboxylate Synthase Isolated from Tomato Fruits**—Shigeru Satoh and Shang Fa Yang*

125 **The Influence of Leaf Age on C_4 Photosynthesis and the Accumulation of Inorganic Carbon in *Flaveria trinervia*, a C_4 Dicot**—Brandon d. Moore* and Gerald E. Edwards

153 **The Effect of Adenine Nucleotides on Purified Phosphoenolpyruvate Carboxylase from the CAM Plant *Crassula argentea***—Pierre Rustin, Christopher Meyer, and Randolph Wedding*

164 **Localization, Solubilization and Characterization of Plant Membrane-Associated Calcium-Dependent Protein Kinases**—Elmar Klucis and Gideon M. Polya*

172 **Purification and Properties of Glucoamylase from Sugar Beet Cells in Suspension Culture**—Hiroshi Masuda*, Manabu Murata, Toshimasa Takahashi, and Shiro Sugawara

207 **Effects of Temperature Pretreatment in the Dark on Photosynthesis of the Intact Spinach Chloroplast**—Chee Fook Fu and Martin Gibbs*

239 **Sucrose Synthase, a Cytosolic Enzyme in Protoplasts of Jerusalem Artichoke Tubers (*Helianthus tuberosus* L.)**—Felix Keller, Marco Frehner*, and Andres Wiemken

245 **Cytokinin Oxidase from *Phaseolus vulgaris* Callus Cultures. Affinity for Concanavalin**—J. Mark Chatfield and Donald J. Armstrong*

248 **A *th-1* Mutant of *Arabidopsis thaliana* Is Defective for a Thiamin-Phosphate-Synthesizing Enzyme: Thiamin Phosphate Pyrophosphorylase**—Yoshibumi Komeda*, Miyako Tanaka, and Takahiro Nishimune

266 **High Performance Liquid Chromatography-Based Reevaluation of Disaccharides Produced upon Incubation of Sugarcane Vacuoles with UDP-Glucose**—Andrew Maretzki* and Margaret Thom

315 ***N,N*-Dimethyltryptamine Production in *Phalaris aquatica* Seedlings. A Mathematical Model for Its Synthesis**—Joseph P. G. Mack, Dawn P. Mulvena, and Michael Slaytor*

329 **Ethylene Production by Attached Leaves or Intact Shoots of Tobacco Cultivars Differing in Their Speed of Yellowing during Curing**—Arcelia A. Alejar, Ries de Visser, and Mary S. Spencer*

348 **The Relationship between Inorganic Nitrogen Metabolism and Proline Accumulation in Osmoregulatory Responses of Two Euryhaline Microalgae**—Iftikhar Ahmad* and Johan A. Hellebust

355 **Survey of the Proteolytic Activities Degrading the Kunitz Trypsin Inhibitor and Glycinin in Germinating Soybeans (*Glycine max*)**—Karl A. Wilson*, Gregory Papastoitsis, Philippe Hartl, and Anna L. Tan-Wilson

389 **The Conversion of Nitrite to Nitrogen Oxide(s) by the Constitutive NAD(P)H-Nitrate Reductase Enzyme from Soybean**—John V. Dean and James E. Harper*

462 **Bicarbonate Inhibits Ribulose-1,5-Bisphosphate Carboxylase**—Felix Mächler* and Josef Nösberger

473 **Cyanide Metabolism in Relation to Ethylene Production in Plant Tissues**—Wing-Kin Yip and Shang Fa Yang*

483 **Identification of a Kinase in Wheat Germ that Phosphorylates the Large Subunit of Initiation Factor 4F**—Jean Humphreys, Karen S. Browning, and Joanne M. Ravel*

491 **Inorganic Carbon Accumulation by *Chlamydomonas reinhardtii*. New Proteins Are Made during Adaptation to Low CO_2**—Livingston J. Manuel and James V. Moroney*

518 **Photosystem II in Guard Cells of *Vicia faba*: Immunological Detection**—Esther Zemel, Ita Leizerovich, and Shimon Gepstein*

528 **Occurrence of Alternative Respiratory Capacity in Soybean and Pea**—David Obenland, Carrie Hiser, Lee McIntosh, Richard Shibles*, and Cecil R. Stewart

540 **Phytochrome Mediated Regulation of Sucrose Phosphate Synthase Activity in Maize**—Terry L. Vassey

543 **Isolation of Intact Chloroplasts from *Dunaliella tertiolecta***—Arun Goyal, Thomas Betsche, and N. E. Tolbert*

553 **Dependence of *in Vivo* Ethylene Production Rate on 1-Aminocyclopropane-1-Carboxylic Acid Content and Oxygen Concentrations**—Wing-Kin Yip*, Xin-Zhi Jiao, and Shang Fa Yang

633 **Histochemical Compartmentation of Photosynthesis in the Crassulacean Acid Metabolism Plant *Crassula falcata***—Stefan A. Springer and William H. Outlaw, Jr.*

656 **Marked Increase in Ascorbate Oxidase Protein in Pumpkin Callus by Adding Copper**—Muneharu Esaka*, Miyuki Uchida, Hiroshi Fukui, Kiyoshi Kubota, and Kanichi Suzuki

695 **Oxygen-18 and Deuterium Labeling Studies of Choline Oxidation by Spinach and Sugar Beet**—Claudia Lerma, Andrew D. Hanson*, and David Rhodes

725 **Alterations in Leaf Carbohydrate Metabolism in Response to Nitrogen Stress**—Thomas W. Rufty, Jr.*, Steven C. Huber, and Richard J. Volk

747 **4-Amino-5-Hexynoic Acid—A Potent Inhibitor of Tetrapyrrole Biosynthesis in Plants**—Tedd D. Elich and J. Clark Lagarias*

770 **Properties of a Small Basic Peptide from Pumpkin Seeds**—Gary H. Naisbitt, Mao-Rong Lu, William R. Gray, and Leo P. Vernon*

815 **Metabolite Diffusion into Bundle Sheath Cells from C_4 Plants. Relation to C_4 Photosynthesis and Plasmodesmatal Function**—Hendrik Weiner, James N. Burnell, Ian E. Woodrow, Hans W. Heldt, and Marshall D. Hatch*

833 **Inhibition of Ethylene Biosynthesis by Salicylic Acid**—Charles A. Leslie and Roger J. Romani*

838 **A Starchless Mutant of *Nicotiana sylvestris* Containing a Modified Plastid Phosphoglucomutase**—Kenneth R. Hanson* and Neil A. McHale

850 **Effects of Irradiance and Methyl Viologen Treatment on ATP, ADP, and Activation of Ribulose Bisphosphate Carboxylase in Spinach Leaves**—Anna Brooks, Archie R. Portis, Jr.*, and Thomas D. Sharkey

854 **Phosphatidylcholine Synthesis. Differing Patterns in Soybean and Carrot**—Anne H. Datko and S. Harvey Mudd*

862 **Carbohydrate Metabolism and Activity of Pyrophosphate: Fructose-6-Phosphate Phosphotransferase in Photosynthetic Soybean (*Glycine max*, Merr.) Suspension Cells**—Steven R. Spilatro and James Michael Anderson*

879 **Biosynthesis of Tetrapyrrole Pigment Precursors. Formation and Utilization of Glutamyl-tRNA for δ-Aminolevulinic Acid Synthesis by Isolated Enzyme Fractions from *Chlorella vulgaris***—Yael J. Avissar and Samuel I. Beale*

896 **Isolation of Dihydroxyacetone Phosphate Reductase from *Dunaliella* Chloroplasts and Comparison with Isozymes from Spinach Leaves**—Robert Gee, Arun Goyal, Dennis Gerber, R. U. Byerrum*, and N. E. Tolbert

930 **A Nuclear Mutation in *Nicotiana sylvestris* Causing a Thiamine-Reversible Defect in Synthesis of Chloroplast Pigments**—Neil A. McHale*, Kenneth R. Hanson, and Israel Zelitch

943 **Immunocytolocalization of Glutamine Synthetase in Green Leaves and Cotyledons of *Lycopersicon esculentum***—Jose R. Botella, Jean P. Verbelen, and Victoriano Valpuesta*

947 **Localization of Nitrogen-Assimilating Enzymes in the Chloroplast of *Chlamydomonas reinhardtii***—Petra Fischer and Uwe Klein*

961 **Characterization of Elemental Sulfur in Isolated Intact Spinach Chloroplasts**—Jacques Joyard*, Eric Forest, Elizabeth Blée, and Roland Douce

965 **Heath Inducible Expression of a Chimeric Maize hsp70CAT Gene in Maize Protoplasts**—Judy Callis*, Michael Fromm, and Virginia Walbot

973 **Interaction between Chloroplasts and Mitochondria in Microalgae. Role of Glycolysis**—Fabrice Rebeille* and Pierre Gans

976 **Kinetic Studies of the Form of Substrate Bound by Phosphoenolpyruvate Carboxylase**—Randolph T. Wedding*, Pierre Rustin, Christopher R. Meyer, and M. Kay Black

980 **Fructose 2,6-Bisphosphate Inhibition of Phosphoglucomutase**—Cynthia M. Galloway*, W. M. Dugger, and C. C. Black, Jr.

1008 **Purification and Assay of Rubisco Activase from Leaves**—Simon P. Robinson, Virginia J. Streusand, J. Mark Chatfield, and Archie R. Portis, Jr.*

1026 **Regulation of Steady State Pyruvate Dehydrogenase Complex Activity in Plant Mitochondria. Reactivation Constraints**—Raymond J. A. Budde and Douglas D. Randall*

1031 **Regulation of the Phosphorylation of Mitochondrial Pyruvate Dehydrogenase Complex *in Situ*. Effects of Respiratory Substrates and Calcium**—Raymond J. A. Budde, Tung K. Fang, and Douglas D. Randall*

1048 **Glutamine Transport and the Role of the Glutamine Translocator in Chloroplasts**—Jianwei Yu and K. C. Woo*

1141 **Inhibition of Nitrate Transport by Anti-Nitrate Reductase IgG Fragments and the Identification of Plasma Membrane Associated Nitrate Reductase in Roots of Barley Seedlings**—Michael R. Ward, Rudolf Tischner, and Ray C. Huffaker*

1154 **Starch Phosphorylase Inhibitor Is β-Amylase**—Shu-Mei Pan, Tsung-Chain Chang, Rong-Huay Juang, and Jong-Ching Su*

1175 **A Starch Deficient Mutant of *Arabidopsis thaliana* with Low ADPglucose Pyrophosphorylase Activity Lacks One of the Two Subunits of the Enzyme**—Tsan-Piao Lin, Timothy Caspar, Chris R. Somerville, and Jack Preiss*

1182 **Subcellular Location of NADPH-Dependent Hydroxypyruvate Reductase Activity in Leaf Protoplasts of *Pisum sativum* L. and Its Role in Photorespiratory Metabolism**—Leszek A. Kleczkowski, Curtis V. Givan*, Jacqueline M. Hodgson, and Douglas D. Randall

1219 ***Shrunken-1* Encoded Sucrose Synthase Is Not Required for Sucrose Synthesis in the Maize Endosperm**—B. Greg Cobb* and L. Curtis Hannah

1222 **Effect of Temperature on Starch Synthesis in Potato Tuber Tissue and in Amyloplasts**—Gangaram Mohabir and Philip John*

1297 **Characteristics of Five New Photoautotrophic Suspension Cultures Including Two *Amaranthus* Species and a Cotton Strain Growing on Ambient CO_2 Levels**—Chunhe Xu, L. C. Blair, S. M. D. Rogers, Govindjee, and J. M. Widholm*

1332 **Substrate Utilization by Suspension Cultures and Somatic Embryos of *Daucus carota* L. Measured by ^{13}C NMR**—Cor Dijkema*, Sacco C. de Vries, Hilbert Booij, Tjeerd J. Schaafsma, and Albert van Kammen

1338 **Enzymes of Phosphatidylcholine Synthesis in *Lemna*, Soybean, and Carrot**—Anne H. Datko and S. Harvey Mudd*

1358 **The tRNA Required for *in Vitro* δ-Aminolevulinic Acid Formation from Glutamate in *Synechocystis* Extracts. Determination of Activity in a *Synechocystis in Vitro* Protein Synthesizing System**—Mark A. Schneegurt, Siegfried Rieble, and Samuel I. Beale*

1373 **Spinach Leaf Chloroplast CO_2 and NO_2^- Photoassimilations Do Not Compete for Photogenerated Reductant. Manipulation of Reductant Levels by Quantum Flux Density Titrations**—J. Michael Robinson

1403 **Effect of Light on Sterol Changes in *Medicago sativa***—Li-Shar Huang and Claus Grunwald*

1411 **Two Isoenzymes of NADH-Dependent Glutamate Synthase in Root Nodules of *Phaseolus vulgaris* L. Purification, Properties, and Activity Changes during Nodule Development**—Feng-Ling Chen and Julie V. Cullimore*

1435 **Identification of Membrane Protein Associated with Sucrose Transport Into Cells of Developing Soybean Cotyledons**—Kevin G. Ripp, Paul V. Viitanen, William D. Hitz*, and Vincent R. Franceschi

1461 **Adenine Nucleotide Levels, Redox State of the NADP System and Assimilatory Force in Nonaqueously Purified Mesophyll Chloroplasts from Maize Leaves under Different Light Intensities**—Hideaki Usuda

1486 **Glycine Supports *in Vivo* Reduction of Nitrate in Barley Leaves**—Polumetla A. Kumar, T. V. R. Nair, and Yash P. Abrol*

MOLECULAR BIOLOGY AND GENE REGULATION

16 **DNA Methylation Occurred around Lowly Expressed Genes of Plastid DNA during Tomato Fruit Development**—Jarunya Ngernprasirtsiri, Hirokazu Kobayashi, and Takashi Akazawa*

21 **Circadian Control of the Accumulation of mRNAs for Light- and Heat-Inducible Chloroplast Proteins in Pea (*Pisum sativum* L.)**—Beate Otto, Bernhard Grimm, Peter Ottersbach, and Klaus Kloppstech*

42 **Chromoplast-Specific Proteins in *Capsicum annuum***—Nouréddine Hadjeb, Ioannis Gounaris, and Carl A. Price*

242 **Phytochrome-Mediated Light Regulation of Nitrate Reductase Expression in Squash Cotyledons**—V. K. Rajasekhar, G. Gowri, and Wilbur H. Campbell*

255 **Photooxidation of Plastids Inhibits Transcription of Nuclear Encoded Genes in Rye (*Secale cereale*)**—Dietrich Ernst* and Katja Schefbeck

340 **Light Effects on Several Chloroplast Components in Norflurazon-Treated Pea Seedlings**—Anurag D. Sagar*, Benjamin A. Horwitz, Robert C. Elliott, William F. Thompson, and Winslow R. Briggs

370 **Regulation of Gene Expression by Ethylene in Wild-Type and *rin* Tomato (*Lycopersicon esculentum*) Fruit**—James E. Lincoln and Robert L. Fisher*

383 **Expression of Leaf Nitrate Reductase Genes from Tomato and Tobacco in Relation to Light-Dark Regimes and Nitrate Supply**—Fabienne Galangau, Françoise Daniel-Vedele*, Thérèse Moureaux, Marie-France Dorbe, Marie-Thérèse Leydecker, and Michel Caboche

401 **Reduction of Turgor Induces Rapid Changes in Leaf Translatable RNA**—Felix D. Guerrero and John E. Mullet*

450 **Hordein Gene Expression in a Low Protein Barley Cultivar**—Jessica E. Dailey, David M. Peterson*, and Thomas C. Osborn

532 **Inheritance of C_4 Enzymes Associated with Carbon Fixation in *Flaveria* Species**—Randall G. Cameron and Carole L. Bassett*

547 **Organ-Specific and Developmental Regulation of the Nopaline Synthase Promoter in Transgenic Tobacco Plants**—Gynheung An*, Michael A. Costa, Amitava Mitra, Sam-Bong Ha, and László Márton

564 **Gene Expression in Developing *Zea mays* Embryos: Regulation by Abscisic Acid of Highly Phosphorylated 23- to 25-kD Group of Proteins**—Adela Goday, Demetrio Sánchez-Martínez, Jordi Gómez, Pere Puigdomènech, and Montserrat Pagès*

588 **Hormonal Regulation of α-Amylase Expression in Barley Aleurone Layers. The Effects of Gibberellic Acid Removal and Abscisic Acid and Phaseic Acid Treatments**—Randall C. Nolan and Tuan-hua David Ho*

594 **Light Regulation of Peridinin-Chlorophyll *a*-Protein (PCP) Complexes in the Dinoflagellate, *Glenodinium* sp. Use of Anti-PCP Antibodies to Detect PCP Gene Products in Cells Grown in Different Light Conditions**—Steven J. Roman*, Nadathur S. Govind, Edward L. Triplett, and Barbara B. Prézelin

649 **Structure, Expression, and Heterogeneity of the Rice Seed Prolamines**—Woo Taek Kim and Thomas W. Okita*

731 **Characterization of an HSP70 Cognate Gene Family in *Arabidopsis***—Cathy H. Wu, Timothy Caspar, John Browse, Susan Lindquist, and Chris Somerville*

741 **Molecular Cloning of Complementary DNA Encoding Maize Nitrite Reductase. Molecular Analysis and Nitrate Induction**—Kristine Lahners, Vance Kramer, Eduard Back, Laura Privalle, and Steven Rothstein*

785 **Proteins under the Control of the Gene for Fe Efficiency in Tomato**—H. Frits Bienfait

969 **Isolation of Viable Wheat Male Gametophytes of Different Stages of Development and Variations in Their Protein Patterns**—Philippe Vergne* and Christian Dumas

993 **Evidence for the Nuclear Location of the Genes for Chloroplast IF-2 and IF-3 *Euglena***—Betsy L. Kraus and Linda L. Spremulli*

1002 **The Synthesis of a 19 Kilodalton Zein Protein in Transgenic *Petunia* Plants**—John D. Williamson, Gad Galili, Brian A. Larkins, and Stanton B. Gelvin*

1063 **Promoter Strength Comparisons of Maize Shrunken 1 and Alcohol Dehydrogenase 1 and 2 Promoters in Mono- and Dicotyledonous Species**—R. M. Hauptmann, M. Ashraf, V. Vasil, L. C. Hannah, I. K. Vasil*, and R. Ferl

1067 **The Role of Nitrate and Ammonium Ions and Light on the Induction of Nitrate Reductase in Maize Leaves**—Ann Oaks*, Michel Poulle, Valerie J. Goodfellow, Leslie A. Cass, and Holger Deising

1077 **Changes in Accumulation and Synthesis of Transcripts Encoding Phycobilisome Components during Acclimation of *Fremyella diplosiphon* to Different Light Qualities**—R. Oelmüller*, P. B. Conley, N. Federspiel, W. R. Briggs, and A. R. Grossman

1084 **Photoreversibility of the Effect of Red and Green Light Pulses on the Accumulation in Darkness of mRNAs Coding for Phycocyanin and Phycoerythrin in *Fremyella diplosiphon***—R. Oelmüller*, Arthur R. Grossman, and W. R. Briggs

1104 **Diurnal and Circadian Rhythms in the Accumulation and Synthesis of mRNA for the Light-Harvesting Chlorophyll *a*/*b*-Binding Protein in Tobacco**—Harald Paulsen and Lawrence Bogorad*

1246 **Light-Dependent Accumulation of Radiolabeled Plastid-Encoded Chlorophyll *a*-Apoproteins Requires Chlorophyll *a*. I. Analysis of Chlorophyll-Deficient Mutants and Phytochrome Involvement**—Robert R. Klein, Patricia E. Gamble, and John E. Mullet*

1257 **Bean Abscission Cellulase. Characterization of a cDNA Clone and Regulation of Gene Expression by Ethylene and Auxin**—Mark L. Tucker*, Roy Sexton, Elena del Campillo, and Lowell N. Lewis

1323 **Expression of Light-Harvesting Chlorophyll *a*/*b*-Protein Genes Is Phytochrome-Regulated in Etiolated *Arabidopsis thaliana* Seedlings**—George A. Karlin-Neumann, Lin Sun, and Elaine M. Tobin*

1397 **Nuclear-Cytoplasmic Partitioning of Phytochrome-Regulated Transcripts in *Pisum sativum***—Anurag D. Sagar*, Winslow R. Briggs, and William F. Thompson

1446 **Production and Characterization of Monoclonal Antibodies to Wall-Localized Peroxidases from Corn Seedlings**—Sung-Ha Kim, Maurice E. Terry, Pepper Hoops, Marianne Dauwalder, and Stanley J. Roux*

ENVIRONMENTAL AND STRESS PHYSIOLOGY

26 **Factors Influencing Protoplast Viability of Suspension-Cultured Rice Cells during Isolation Process**—Shigetaka Ishii

30 **Localization and Toxic Effects of Cadmium, Copper, and Uranium in *Azolla***—Mordechai Sela, Elisha Tel-Or*, Eberhardt Fritz, and Aloys Huttermann

102 **Preliminary Genetic Studies of the Phenotype of Betaine Deficiency in *Zea mays* L.**—David Rhodes* and Patrick J. Rich

148 **Regulation of Ribulose-1,5-Bisphosphate Carboxylase Activity in *Alocasia macrorrhiza* in Response to Step Changes in Irradiance**—Jeffrey R. Seemann*, Miko U. F. Kirschbaum, Thomas D. Sharkey, and Robert W. Pearcy

178 **Xanthoxin Metabolism in Cell-free Preparations from Wild Type and Wilty Mutants of Tomato**—Ram K. Sindhu and Daniel C. Walton*

183 **Effects of Various Levels of CO_2 on the Induction of Crassulacean Acid Metabolism in *Portulacaria afra* (L.) Jacq.**—Alfredo J. Huerta and Irwin P. Ting*

200 **Chloroplast Osmotic Adjustment and Water Stress Effects on Photosynthesis**—Ashima Sen Gupta and Gerald A. Berkowitz*

213 **Stable Carbon Isotope Composition ($\delta^{13}C$), Water Use Efficiency, and Biomass Productivity of *Lycopersicon esculentum, Lycopersicon pennellii*, and the F_1 Hybrid**—Bjorn Martin* and Yvonne R. Thorstenson

218 **Effects of Air Pollutants on the Composition of Stable Carbon Isotopes, $\delta^{13}C$, of Leaves and Wood, and on Leaf Injury**—Bjorn Martin*, Andrzej Bytnerowicz, and Yvonne R. Thorstenson

233 **Salinity Stress Inhibits Bean Leaf Expansion by Reducing Turgor, Not Wall Extensibility**—Peter M. Neumann*, Elizabeth Van Volkenburgh, and Robert E. Cleland

289 **Water Deficit-Induced Changes in Abscisic Acid, Growth, Polysomes, and Translatable RNA in Soybean Hypocotyls**—Robert J. Bensen*, John S. Boyer, and John E. Mullet

375 **Water Deficit and Associated Changes in Some Photosynthetic Parameters in Leaves of 'Valencia' Orange (*Citrus sinensis* [L.] Osbeck)**—Joseph C. V. Vu* and George Yelenosky

418 **Proton Extrusion by Wheat Roots Exhibiting Severe Aluminum Toxicity Symptoms**—Thomas B. Kinraide

454 **Changes in Protein Synthesis Induced in Tomato by Chilling**—Pam Cooper and Donald R. Ort*

477 **Depression of Photosynthesis, Growth, and Yield in Field-Grown Green Pepper (*Capsicum annuum* L.) Exposed to Acidic Fog and Ambient Ozone**—Brent K. Takemoto*, Andrzej Bytnerowicz, and David M. Olszyk

506 **Use of a Laser-Driven Photoacoustic Detection System for Measurement of Ethylene Production in *Cymbidium* Flowers**—Ernst J. Woltering*, Frans Harren, and Henrie A. M. Boerrigter

511 **Incorporation of [^{14}C]Glucose into Cell Wall Polysaccharides of Cotton Roots: Effects of NaCl and $CaCl_2$**—Hailin Zhong and André Läuchli*

559 **Temporary Disturbance of Translocation of Assimilates in Douglas Firs Caused by Low Levels of Ozone and Sulfur Dioxide**—Antonie Gorissen* and Johannes A. van Veen

574 **Do Woody Plants Operate Near the Point of Catastrophic Xylem Dysfunction Caused by Dynamic Water Stress? Answers from a Model**—Melvin T. Tyree* and John S. Sperry

581 **Mechanism of Water Stress-Induced Xylem Embolism**—John S. Sperry* and Melvin T. Tyree

605 **Charge Balance in NO_3^--Fed Soybean. Estimation of K^+ and Carboxylate Recirculation**—Bruno Touraine*, Nicole Grignon, and Claude Grignon

618 **Interaction of Heat and Salt Shock in Cultured Tobacco Cells**—H. Michael Harrington* and David M. Alm

626 **Desiccation Tolerance of *Papaver dubium* L. Pollen during Its Development in the Anther. Possible Role of Phospholipid Composition and Sucrose Content**—Folkert A. Hoekstra* and Tineke van Roekel

661 **Glyphosate Tolerance in Tobacco (*Nicotiana tabacum* L.)**—William E. Dyer, Stephen C. Weller, Ray A. Bressan, and Klaus M. Herrmann*

690 **Salinity Effects on Photosynthesis, Carbon Allocation, and Nitrogen Assimilation in the Red Alga, *Gelidium coulteri***—Bruce A. Macler

703 **Abscisic Acid Is Not the Only Stomatal Inhibitor in the Transpiration Stream of Wheat Plants**—Rana Munns* and Rod W. King

718 **Resistance to Water Transport in Shoots of *Vitis vinifera* L. Relation To Growth at Low Water Potential**—Hans R. Schultz and Mark A. Matthews*

805 **Hypoxic Stress Inhibits the Appearance of Wound-Response Proteins in Potato Tubers**—Michael E. Vayda* and Holly J. Schaeffer

829 **Sugars and Desiccation Tolerance in Seeds**—Karen L. Koster* and A. Carl Leopold

869 **Exploring the Limits of Crop Productivity. I. Photosynthetic Efficiency of Wheat in High Irradiance Environments**—Bruce G. Bugbee* and Frank B. Salisbury

915 **Development, Distribution, and Characteristics of Intrinsic, Nonbacterial Ice Nuclei in *Prunus* Wood**—Dennis C. Gross*, Edward L. Proebsting, Jr., and Heather Maccrindle-Zimmerman

953 **Phase Shift of the Circadian Rhythm of *Lemna* Caused by Pulses of a Leucine Analog, Trifluoroleucine**—Takao Kondo

1055 **A New UV-A/B Protecting Pigment in the Terrestrial Cyanobacterium *Nostoc commune***—S. Scherer, T. W. Chen, and P. Böger*

1058 **Correlation of Stomatal Conductance with Photosynthetic Capacity of Cotton Only in a CO_2-Enriched Atmosphere: Mediation by Abscisic Acid?**—John W. Radin*, Wolfram Hartung, Bruce A. Kimball, and Jack R. Mauney

1092 **Degradation of Proteins Artifically Introduced into Vacuoles of *Chara australis***—Yuji Moriyasu* and Masashi Tazawa

1110 **Evidence for Involvement of Phytochrome in Tumor Development on Plants**—Robert C. Morrow* and Theodore W. Tibbitts

1115 **The Regulation of Photosynthesis in Leaves of Field-Grown Spring Wheat (*Triticum aestivum* L., cv Albis) at Different Levels of Ozone in Ambient Air**—Berchtold Lehnherr*, Felix Mächler, Ariane Grandjean, and Jürg Fuhrer

1120 **CO_2 Fixation Rate and RuBisCO Content Increase in the Halotolerant Cyanobacterium, *Aphanothece halo-***

***phytica*, Grown in High Salinities**—Tetsuko Takabe*, Aran Incharoensakdi, Keita Arakawa, and Sadaki Yokota

1131 Heath Shock Enhances the Synthesis of a Lectin-Related Protein in *Dolichos biflorus* Cell Suspension Cultures—Joanne P. Spadoro-Tank and Marilynn E. Etzler*

1210 Drought- and ABA-Induced Changes in Polypeptide and mRNA Accumulation in Tomato Leaves—Elizabeth A. Bray

1263 The Effects of Salt Stress on Polypeptides in Membrane Fractions from Barley Roots—William J. Hurkman*, Charlene K. Tanaka, and Frances M. DuPont

1274 Sodium and Potassium Compartmentation and Transport across the Roots of Intact *Spergularia marina*—Dennis Lazof* and John M. Cheeseman

1279 Sodium and Potassium Compartmentation and Transport in the Roots of Intact Lettuce Plants—Dennis Lazof* and John M. Cheeseman

1303 Uptake and Assimilation of NO_3^- and NH_4^+ by Nitrogen-Deficient Perennial Ryegrass Turf—Daniel C. Bowman* and Jack L. Paul

1310 Effects of CO_2 Concentration on Rubisco Activity, Amount, and Photosynthesis in Soybean Leaves—William J. Campbell*, L. H. Allen, Jr., and George Bowes

1381 Mechanisms of Starvation Tolerance in Pearl Millet—Chris Baysdorfer*, Robert D. Warmbrodt, and William J. Van Der Woude

1407 Regulation of Assimilatory Sulfate Reduction by Cadmium in *Zea mays* L.—S. Nussbaum, D. Schmutz, and C. Brunold*

1418 Correlation between the Carbon Isotope Discrimination in Leaf Starch and Sugars of C_3 Plants and the Ratio of Intercellular and Atmospheric Partial Pressures of Carbon Dioxide—Enrico Brugnoli*, Kerry T. Hubick, Susanne von Caemmerer, Suan Chin Wong, and Graham D. Farquhar

DEVELOPMENT AND GROWTH REGULATION

10 Effect of Dark Pretreatment on the Kinetics of Response of Barley Pulvini to Gravistimulation and Hormones—Thomas G. Brock* and Peter B. Kaufman

92 Kinetics of Determination in the Differentiation of Isolated Mesophyll Cells of *Zinnia elegans* to Tracheary Elements—Diane L. Church* and Arthur W. Galston

131 Regulation of Electrogenic Proton Pumping by Auxin and Fusicoccin as Related to the Growth of *Avena* Coleoptiles—Alfred P. Senn and Mary Helen M. Goldsmith*

143 Effect of Endogenously Synthesized and Exogenously Applied Ethanol on Tomato Fruit Ripening—Maureen O. Kelly and Mikal E. Saltveit, Jr.*

224 Polyamines in Relation to Growth in Carrot Cell Cultures—Kevin M. Fallon and Richard Phillips*

276 Fluence-Response Curves and Action Spectra for the Very Low Fluence and the Low Fluence Response for the Induction of Kalanchoë Seed Germination—Edwin De Petter*, Luc Van Wiemeersch, Roger Rethy, Andrée Dedonder, Henri Fredericq, and Jan De Greef

295 Senescence-Related Changes in ATP-Dependent Uptake of Calcium into Microsomal Vesicles from Carnation Petals—Gopinadhan Paliyath* and John E. Thompson

309 A Survey of the Pectic Content of Nonlignified Monocot Cell Walls—Michael C. Jarvis*, Wilson Forsyth, and Henry J. Duncan

361 The Biophysical Basis of Elongation Growth in Internodes of Deepwater Rice—Ulrich Kutschera and Hans Kende*

379 Nutrient Salts Promote Light-Induced Degradation of Indole-3-Acetic Acid in Tissue Culture Media—James R. Dunlap* and Karen M. Robacker

409 Long-Term *in Vitro* Culture of Wheat Grains—Eitan Millet* and Robert J. Jones

412 Development of Oat Prothylakoids into Thylakoids during Greening Does Not Change Transmembrane Galactolipid Asymmetry but Preserves the Thylakoid Bilayer—Christian Giroud and Paul-Andre Siegenthaler*

424 Localization of the Site of Perception of Thermoinductive Temperatures in *Thlaspi arvense* L.—James D. Metzger

435 Identification of L-Tryptophan as an Endogenous Inhibitor of Embryo Germination in White Wheat—Craig F. Morris, Delbert D. Mueller, Jon M. Faubion, and Gary M. Paulsen*

441 Diamine Oxidase in Cotyledons of *Pisum sativum* Develops as a Result of the Supply of Oxygen through the Embryonic Axis during Germination—Eiji Hirasawa

466 Sucrose and Malic Acid as the Compounds Exported to the Apical Bud of Pea following $^{14}CO_2$ Labeling of the Fruit. No Evidence for a Senescence Factor—Douglas A. Hamilton and Peter J. Davies*

515 A Refined Technique to Apply Electrical Currents to Callus Cultures—Keerti S. Rathore*, Thomas K. Hodges, and Kenneth R. Robinson

522 Ethylene Effect on Extensin and Peroxidase Distribution in the Subapical Region of Pea Epicotyls—Gladys I. Cassab*, Jih-Jing Lin, Liang-Shiou Lin, and Joseph E. Varner

525 Determination of Abscisic Acid in *Pinus densiflora* by Selected Ion Monitoring—Ryo Funada*, Tamizi Sugiyama, Takafumi Kubo, and Masami Fushitani

600 Effect of Hormone Treatment on Growth Bud Formation and Free Amine and Hydroxycinnamoyl Putrescine Levels in Leaf Explant of *Nicotiana tabacum* Cultivated *in Vitro*—Josette Martin-Tanguy*, Claude Martin, Michel Paynot, and Nadia Rossin

639 Identification of Endogenous Gibberellins in Navel Orange Shoots—Stephen M. Poling* and Vincent P. Maier

671 Chemical Structure of the Cell Walls of Dwarf Maize and Changes Mediated by Gibberellin—Nicholas C. Carpita* and Jan Kanabus

679 4-Coumarate:Coenzyme A Ligase and Isoperoxidase Expression in *Zinnia* Mesophyll Cells Induced to Differentiate into Tracheary Elements—Diane L. Church* and Arthur W. Galston

752 Polar Transport of 1-Naphthaleneacetic Acid Determines the Distribution of Flower Buds on Explants of Tobacco—Marinus J. M. Smulders*, Anton F. Croes, and George J. Wullems

774 Characterization of an Ethylene Overproducing Mutant of Tomato (*Lycopersicon esculentum* Mill. Cultivar VFN8)—David W. Fujino, David W. Burger*, Shang Fa Yang, and Kent J. Bradford

780 Quantification of Indole-3-Acetic Acid in Dark-Grown Seedlings of the *Diageotropica* and *Epinastic* Mutants of Tomato (*Lycopersicon esculentum* Mill.)—David W. Fujino, Scott J. Nissen, A. Daniel Jones, David W. Burger*, and Kent J. Bradford

788 **Cytokinin Biochemistry in Relation to Leaf Senescence. IV. Cytokinin Metabolism in Soybean Explants**—Santokh Singh, David S. Letham*, Paula E. Jameson, Ren Zhang, Charles W. Parker, Jane Bandenoch-Jones, and Larry D. Noodén

795 **Effect of Ethylene Treatment on Polar IAA Transport, Net IAA Uptake and Specific Binding of *N*-1-Naphthylphthalamic Acid in Tissues and Microsomes Isolated from Etiolated Pea Epicotyls**—Jeffrey C. Suttle

823 **Pulse-Induced Phototropisms in Oat and Maize Coleoptiles**—Moritoshi Iino

845 **Correlation between Auxin Resistance and the Lack of a Membrane-Bound Auxin Binding Protein and a Root-Specific Peroxidase in *Nicotiana tabacum***—Chiharu Nakamura*, Hendrik-Jan Van Telgen, Albert M. Mennes, Hajime Ono, and Kees R. Libbenga

904 **Changes in Two Forms of Membrane-Associated Cellulase during Ethylene-Induced Abscission**—Elena del Campillo*, Mary Durbin, and Lowell N. Lewis

910 **Changes in the Levels of Calmodulin and of a Calmodulin Inhibitor in the Early Phases of Radish (*Raphanus sativus* L.) Seed Germination. Effects of ABA and Fusicoccin**—Maurizio Cocucci* and Noemi Negrini

959 **Monoclonal Antibodies to 13-Deoxy-Gibberellins**—J. Paul Knox, Michael H. Beale, Geoffrey W. Butcher, and Jake MacMillan*

983 **Root Formation in Deteriorated (Aged) Wheat Embryos**—Gitali Das and Swati Sen-Mandi*

990 **Inhibitoin of Somatic Embryogenesis in Orchardgrass by Endogenous Cytokinins**—Allan R. Wenck, Bob V. Conger*, Robert N. Trigiano, and Carl E. Sams

996 **Binding of Spermidine to a Unique Protein in Thin-Layer Tobacco Tissue Culture**—Akiva Apelbaum, Zoe N. Canellakis, Philip B. Applewhite, Ravindar Kaur-Sawhney, and Arthur W. Galston*

999 **Fusicoccin Activity and Binding in *Arabidopsis thaliana***—Richard G. Stout

1037 **Products Released from Enzymically Active Cell Wall Stimulate Ethylene Production and Ripening in Preclimacteric Tomato (*Lycopersicon esculentum* Mill.) Fruit**—Jeffrey K. Brecht* and Donald J. Huber

1136 **Plant Hormone Interaction and Phenolic Metabolism in the Regulation of Russet Spotting in Iceberg Lettuce**—Dangyang Ke and Mikal E. Saltveit, Jr.*

1186 **Gravitropism in Higher Plant Shoots. V. Changing Sensitivity to Auxin**—Frank B. Salisbury*, Linda Gillespie, and Patricia Rorabaugh

1207 **Phytochrome-Mediated Control of Diamine Oxidase Level in the Epicotyl of Etiolated Lentil (*Lens culinaris* Medicus) Seedlings**—Riccardo Angelini, Rodolfo Federico*, and Alberto Mancinelli

1240 **Growth Inhibition, Turgor Maintenance, and Changes in Yield Threshold after Cessation of Solute Import in Pea Epicotyls**—Judy Gougler Schmalstig* and Daniel J. Cosgrove

1349 **Characterization of Fructan from Mature Leaf Blades and Elongation Zones of Developing Leaf Blades of Wheat, Tall Fescue, and Timothy**—William G. Spollen and Curtis J. Nelson*

1425 **Synthesis and Biological Activity of an Azido Derivative of Paclobutrazol, an Inhibitor of Gibberellin Biosynthesis**—David L. Hallahan, Anthony P. Heasman, Martin C. Grossel, Robert Quigley, Peter Hedden, and John R. Bowyer*

1430 **Senescence-Specific Increase in Cytosolic Glutamine Synthetase and Its mRNA in Radish Cotyledons**—Naoto Kawakami and Akira Watanabe*

1454 **A Proteinase from Germinating Barley. I. Purification and Some Physical Properties of a 30 kD Cysteine Endoproteinase from Green Malt**—M. Poulle and Berne L. Jones*

1474 **Enzymic Synthesis of Indole-3-Acetyl-1-*O*-β-D-Glucose. I. Partial Purification and Characterization of the Enzyme from *Zea mays***—Antoni J. Leznicki and Robert S. Bandurski*

1481 **Enzymic Synthesis of Indole-3-Acetyl-1-*O*-β-D-Glucose. II. Metabolic Characteristics of the Enzyme**—Antoni J. Leznicki and Robert S. Bandurski*

CELLULAR AND STRUCTURAL BIOLOGY

139 **Effects of Analogs of the Fungal Sexual Pheromone Sirenin on Male Gamete Motility in *Allomyces macrogynus***—Jeffrey C. Pommerville*, J. Byron Strickland, Daniel Romo, and Kenn E. Harding

189 **Action Spectrum for Interaction between Visible and Far-Red Light on Face Chloroplast Orientation in *Mougeotia***—Zbigniew Lechowski* and Jan Białczyk

228 **Light-Affected Ca^{2+} Fluxes in Protoplasts from *Vallisneria* Mesophyll Cells**—Shingo Takagi and Reiko Nagai*

613 **Intracellular Sites of Synthesis and Storage of 1-(Malonylamino)cyclopropane-1-Carboxylic Acid in *Acer pseudoplatanus* Cells**—Mondher Bouzayen, Alain Latché, Gilbert Alibert, and Jean-Claude Pech*

685 **Solubilization and Characterization of a Membrane-Bound Auxin-Binding Protein from Cell Suspension Cultures of *Nicotiana tabacum***—Chiharu Nakamura* and Hajime Ono

764 **Two-Dimensional Electrophoretic Studies of the Proteins and Polypeptides in Mature Pollen Grains and the Male Germ Unit of *Plumbago zeylanica***—Norman R. Geltz and Scott D. Russell*

887 **Light Quality and Osmoregulation in *Vicia* Guard Cells. Evidence for Involvement of Three Metabolic Pathways**—Gary Tallman* and Eduardo Zeiger

1146 **A Soluble Protein Factor is Required *in Vitro* for Membrane Insertion of the Thylakoid Precursor Protein, pLHCP**—Donald R. Fulson and Kenneth Cline*

1168 **Evidence for Precursor Forms of the Low Isoelectric Point α-Amylase Isozymes Secreted by Barley Aleurone Cells**—John V. Jacobsen*, Douglas S. Bush, Lilianne Sticher, and Russell L. Jones

1215 **Intraorganellar Distribution of Superoxide Dismutase in Plant Peroxisomes (Glyoxysomes and Leaf Peroxisomes)**—Luisa M. Sandalio and Luis A. Del Río*

1285 **Paralytic Shellfish Toxins in *Protogonyaulax tamarensis* and *Protogonyaulax catenella* in Axenic Culture**—Barbara A. Boczar*, Mark K. Beitler, John Liston, John J. Sullivan, and Rose Ann Cattolico

1317 **Immunocytochemical Localization of a Wheat Germ Lysozyme in Wheat Embryo and Coleoptile Cells and Cytochemical Study of Its Interaction with the Cell Wall**—Patrice Audy, Nicole Benhamou*, Jean Trudel, and Alain Asselin

1354 **Immunogold Localization of Nitrate Reductase in Maize Leaves**—Kevin C. Vaughn* and Wilbur H. Campbell

MICROBE-PLANT INTERACTIONS

37 **Molecular Features Affecting the Biological Activity of the Host-Selective Toxins from *Cochliobolus victoriae***—T. J. Wolpert, V. Macko*, W. Acklin, and D. Arigoni

115 **Endogenous Ethylene Production Is a Potential Problem in the Measurement of Nitrogenase Activity Associated with Excised Corn and Sorghum Roots**—Charles Sloger* and Peter van Berkum

270 **Chitinases and β-1,3-Glucanases in the Apoplastic Compartment of Oat Leaves (*Avena sativa* L.)**—Werner Fink, Mathias Liefland, and Kurt Mendgen*

321 **Nodulin Gene Expression in Effective Alfalfa Nodules and in Nodules Arrested at Three Different Stages of Development**—Joanna H. Norris, Lisa A. Macol, and Ann M. Hirsch*

333 **Oats Tolerant of *Pseudomonas syringae* pv. *tabaci* Contain Tabtoxinine-β-Lactam-Insensitive Leaf Glutamine Synthetases**—Thomas J. Knight, Daniel R. Bush, and Pat J. Langston-Unkefer*

396 **Alfalfa Root Exudates and Compounds which Promote or Inhibit Induction of *Rhizobium meliloti* Nodulation Genes**—N. Kent Peters* and Sharon R. Long

537 **When Does the Self-Regulatory Response Elicited in Soybean Root after Inoculation Occur?**—Nasir S. A. Malik* and Wolfgang D. Bauer

570 **Transformation of Soybean Cells Using Mixed Strains of *Agrobacterium tumefaciens* and Phenolic Compounds**—Lowell D. Owens* and Ann C. Smigocki

936 **Antifungal Hydrolases in Pea Tissue. II. Inhibition of Fungal Growth by Combinations of Chitinase and β-1-3-Glucanase**—Felix Mauch*, Brigitte Mauch-Mani, and Thomas Boller

1229 **Inhibition of Nodule Functioning in Cowpea by a Xanthine Oxidoreductase Inhibitor, Allopurinol**—Craig A. Atkins*, Paul J. Sanford, Paul J. Storer, and John S. Pate

1291 **Induction of Sesquiterpene Cyclase and Suppression of Squalene Synthetase Activities in Plant Cell Cultures Treated with Fungal Elicitor**—Urs Vögeli and Joseph Chappell*

MEMBRANES AND BIOENERGETICS

1 **Explorations in the "Inner Sanctum of the Photosynthetic Process," the Water Oxidizing System**—Peter H. Homann

6 **Active Transport of Inorganic Carbon Increases the Rate of O_2 Photoreduction by the Cyanobacterium *Synechococcus* UTEX 625**—Anthony G. Miller*, George S. Espie, and David T. Canvin

77 **Chemical Equivalence of Phosphoenzyme Reaction States in the Catalytic Mechanism of the Red Beet (*Beta vulgaris* L.) Plasma Membrane ATPase**—Donald P. Briskin

84 **Phosphorylation and Dephosphorylation Reactions of the Red Beet Plasma Membrane ATPase Studied in the Transient State**—Donald P. Briskin

119 **Characterization of an ATPase Associated with the Inner Envelope Membrane of Amyloplasts from Suspension-Cultured Cells of Sycamore (*Acer pseudoplatanus* L.)**—Poontariga Harinasut, Tetsuko Takabe, Takashi Akazawa*, Mitsuo Tagaya, and Toshio Fukui

158 **Relationship between Steady-State Fluorescence Yield and Photosynthetic Efficiency in Spinach Leaf Tissue**—Richard B. Peterson*, Mirta N. Sivak, and David A. Walker

194 **Structural Effects of Cl^- and Other Anions on the Water Oxidizing Complex of Chloroplast Photosystem II**—Peter H. Homann

251 **Tonoplast Stability and Survival of Isolated Vacuoles in Different Buffers**—Jose Luis Diaz De Leon, Jaleh Daie*, and Roger Wyse

259 **Analysis of the Reaction Products from Incubation of Sugarcane Vacuoles with Uridine-Diphosphate-Glucose: No Evidence for the Group Translocator**—Joachim Preisser and Ewald Komor*

284 **Is There a Role for the 42 Kilodalton Polypeptide in Inorganic Carbon Uptake by Cyanobacteria?**—Rakefet Schwarz, Devorah Friedberg, and Aaron Kaplan*

303 **On the Presence of a Nicotinamide Nucleotide Transhydrogenase in Mitochondria from Potato Tuber**—E. Carlenor, B. Persson, E. Glaser, B. Andersson, and J. Rydström*

367 **Regulation of Apoplastic pH in Source Leaves of *Vicia faba* by Gibberellic Acid**—Beny Aloni, Jaleh Daie*, and Roger E. Wyse

429 ***Cercospora beticola* Toxin Inhibits Vanadate-Sensitive H^+ Transport in Corn Root Membrane Vesicles**—Jean-Pierre Blein*, Isabelle Bourdil, Michel Rossignol, and René Scalla

444 **Plant Plasma Membrane Proteins. II. Biotinylation of *Daucus carota* Protoplasts and Detection of Plasma Membrane Polypeptides after SDS-PAGE**—Howard D. Grimes*, Raymond M. Slay, and Thomas K. Hodges

487 **Amino Acid Transport into Membrane Vesicles Isolated from Zucchini. Evidence of a Proton-Amino Acid Symport in the Plasmalemma**—Daniel R. Bush* and Pat J. Langston-Unkefer

497 **Immunological Characterization of Iron-Regulated Membrane Proteins in the Cyanobacterium *Anacystis nidulans* R2**—Harold C. Riethman and Louis A. Sherman*

643 **Potassium Channels in Motor Cells of *Samanea saman*. A Patch-Clamp Study**—Nava Moran*, Gerald Ehrenstein, Kunihiko Iwasa, Charles Mischke, Charles Bare, and Ruth L. Satter

667 **Symplastic Transfer of Fluorescent Dyes from Mesophyll to Sieve Tube in Stripped Leaf Tissue and Partly Isolated Minor Veins of *Commelina benghalensis***—W. J. P. van Kesteren, C. van der Schoot, and A. J. E. van Bel*

709 **Preparation and Characterization of Envelope Membranes from Nongreen Plastids**—Claude Alban, Jacques Joyard*, and Roland Douce

757 **Characterization of the Na^+-Requirement in Cyanobacterial Photosynthesis**—George S. Espie*, Anthony G. Miller, and David T. Canvin

800 **Carbonyl Sulfide: An Inhibitor of Inorganic Carbon Transport in Cyanobacteria**—Teruo Ogawa* and Robert K. Togasaki

810 **Ferredoxin Cross-Links to a 22 kD Subunit of Photosystem I**—April L. Zilber and Richard Malkin*

923 **Effects of Growth Irradiance and Nitrogen Limitation on Photosynthetic Energy Conversion in Photosystem II**—Zbigniew Kolber*, Jonathan Zehr, and Paul Falkowski

987 **Measurements of Proton Pumping in *Arum maculatum* Mitochondria**—Betty K. Ishida* and John M. Palmer

1015 **Characterization of the Hexose Transport System in Maize Root Tips**—Jian-Hua Xia and Pierre H. Saglio*

1021 **Sites of Inhibition by Disulfiram in Thylakoid Membranes**—Danny J. Blubaugh and Govindjee*

1042 **L-Glutamate-Dependent Medium Alkalinization by *Asparagus* Mesophyll Cells. Cotransport or Metabolism**—Steve L. McCutcheon, Bruce W. Ciccarelli, Induk Chung, Barry Shelp, and Alan W. Bown*

1073 **Effects of Inorganic Phosphate on the Plasma Membrane H^+-ATPase from Red Beet (*Beta vulgaris* L.)**—Luis E. González de la Vara* and Guadalupe Medina

1097 **Transport Properties of the Tomato Fruit Tonoplast. III. Temperature Dependence of Calcium Transport**—Daryl C. Joyce, Grant R. Cramer, Michael S. Reid, and Alan B. Bennett*

1125 **Carbon Dioxide-Induced Oscillations in Fluorescence and Photosynthesis. Role of Thylakoid Membrane Energization in Regulation of Photosystem II Activity**—Richard B. Peterson*, Mirta N. Sivak, and David A. Walker

1157 **Calcium Transport in Protoplasts Isolated from *ml-o* Barley Isolines Resistant and Susceptible to Powdery Mildew**—Anne F. Wrona*, Roger M. Spanswick, and James R. Aist

1163 **Anion-Sensitive Mg^{2+} ATP-Dependent Proton Pumping in Microsomal Membranes from *Phycomyces blakesleeanus* Bgff**—Thomas Rausch*, Sigrid Soffel, and Willy Hilgenberg

1195 **Determination of the Rate Limiting Step for Photosynthesis in a Nearly Isonuclear Rapeseed (*Brassica napus* L. Biotype Resistant to Atrazine**—Paul A. Jursinic* and Robert W. Pearcy

1201 **Structural Aspects of Photosystem I from *Dunaliella salina***—Barry D. Bruce and Richard Malkin*

1235 **Sugar Uptake by Maize Endosperm Suspension Cultures**—Frederick C. Felker* and James C. Goodwin

1388 **A Comparative Spin-Label Study of Isolated Plasma Membranes and Plasma Membranes of Whole Cells and Protoplasts from Cold-Hardened and Nonhardened Winter Rye**—John J. Windle

1469 **H^+ Cotransports in Corn Roots as Related to the Surface pH Shift Induced by Active H^+ Excretion**—Jean-Baptiste Thibaud, Jean-Claude Davidian, Hervé Sentenac, André Soler, and Claude Grignon*

NATURAL PRODUCTS
